**RE: Shear relocation at left side of house due to Super Family Option
Plan 3 / Series II - Heritage Place / Epick Homes**

To whom it may concern:

This letter is to verify that for the plan stated above, the conflict with a shear wall and a window at the left side of the Super Family Option has been addressed by this office. The following items must be installed:

- The 8'-0" shear wall must be relocated along the same wall line with the original shear wall type.
- The new holdown anchors at both ends of the wall shall consist of the Simpson MTT28B. Install a 5/8" diameter threaded rod using the Simpson SET Epoxy System. The rod must have a minimum embedment depth of 10" into the footing.
- Additional anchor bolts may be added using the same diameter all-thread rods as specified on the shear wall schedule. Epoxy using Simpson Epoxy System with 5" of embedment into concrete.

If I can be of further assistance, please call me.
