Budget and Finance Committee  
Sacramento, California

Honorable Members in Session:

SUBJECT: Morrison Creek Landscaping Phase II - Project Approval and Fund  
Appropriation (JN:2153)

SUMMARY

Plans and specifications have been completed for the landscaping portion of the Morrison Creek Deepening project which has recently been completed, and bids will be received on August 8, 1989. Approval of the project and fund appropriation is recommended.

BACKGROUND

The Morrison Creek Deepening project, which extends from the Central California Traction Company Railroad to approximately 600 feet east of Elk Grove-Florin Road, was recently completed. The 404 Permit from the Corps of Engineers requires installation of landscaping and irrigation for the deepening project during the present construction season. Because of a potential funding shortfall, it is proposed to separate the landscaping and irrigation project from the deepening project and establish a separate budget to provide better tracking of project costs.

A Negative Declaration for the Morrison Creek Deepening project, including the landscaping portion, was filed with the County Clerk of the County of Sacramento on July 11, 1984. The engineer's estimated construction cost is \$44,200 for the landscaping and irrigation project. The City Council authorized bid advertisement for this project on July 18, 1989, with the understanding that funds would be appropriated prior to contract award. Bids will be received on August 8, 1989.

FINANCIAL DATA

No funds have been appropriated for this project. The estimated total project cost, including all planning, design and construction costs is \$50,000. It is proposed that \$50,000 be appropriated from the Drainage Contingency Reserve (425) Fund for this project.
