Re: Hole in Shearwall @ Bedroom 2 Flue: Plan 2813 – The Palms  
 O'Connor Freeman Job Number: E020909

Dear Gerry:

You contacted our office concerning several holes that were made in the second floor shearwall on Plan 2813 of the Palms project. Specifically, the 27' shearwall along the bedroom 2/master bedroom wall needs a 10"x10" hole in the plywood and a 9"x9" hole in the rim joist to allow for the house duct work. Our office has reviewed this situation and have determined that the 10"x10" hole in the plywood should be reinforced with 2x blocking on each side of the hole and edge-nailed to the plywood. The 9"x9" hole in the rim joist will not need to be reinforced but it should be verified that no wall studs or posts on the second floor align with the hole. If a stud(s) align with the hole an additional stud should be placed on each side of the hole onto the non-cut rim joist. If a post load aligns with the hole, the engineer of record will need to be contacted for further review.

It should be noted that you have also informed our office that on Lot 7 along the same shear line the (2) holes mentioned above were replaced with (1) 18" high x 22" wide hole within the plywood. Our office has reviewed this situation and has determined that the hole should be reinforced per detail 24/SD.

If you should have any further questions or comments please do not hesitate to call.

Sincerely,

**O'Connor Freeman & Associates, Inc.**
