KITCHEN, BATHROOM, AND UTILITY ROOM REMODEL PERMITS

The following is the City of Sacramento questionnaire used for proposed single-family residential (R-3 occupancy type) kitchen, bathroom, and utility room remodel permits. The answers to these questions will determine if this remodel can be considered a "fast-track" (same day) over-the-counter permit or whether the City of Sacramento Building Division requires an additional review. Note that even with this form, floor plans of the remodeled areas, both before and after design and floor plan layouts will be required for any permit.

This form cannot be used if any one of the following is present: (1) this is an apartment or condominium building (R-1 occupancies); (2) if new or remodeled exterior walls are located less than 3 ft. from a property line; (3) if any separation wall between the garage and residence is altered; and (4) there shall be no new or repaired masonry fireplaces.

Further, if the intended scope of work changes during the course of construction to include any of these items or additional items not mentioned in this questionnaire (e.g.; bedroom remodel, living room remodel, etc.); revisions to this permit or entirely new permits must be obtained, with all applicable subsequent fees and fines to be paid accordingly. When in question, scope of work changes that constitute additional permit information will be determined by the City of Sacramento inspection staff.

SMOKE DETECTORS (2001 CBC 310.9 Requirements)

1. General. Dwelling units, congregate residences and hotel or lodging houseguest rooms that are used for sleeping purposes shall be provided with smoke detectors. Detectors shall be installed in accordance with the approved manufacturer's instructions.
2. Additions, alterations or repairs to Group R Occupancies. When the valuation of an addition, alteration or repair to Group R Occupancy exceeds \$1,000 and a permit is required, or when one or more sleeping rooms are added or created in existing R Occupancies, smoke detectors shall be installed in accordance with Section 310.9.1.2, CBC.
3. Power source. In new construction, required smoke detectors shall receive their primary power from the building wiring when such wiring is served from a commercial source and shall be equipped with a battery backup. The detector shall emit a signal when the batteries are low. Wiring shall be permanent and without a disconnecting switch other than those required- for over current protection. Smoke detectors may be solely battery operated when installed in existing buildings or in buildings without commercial power, or in buildings, which undergo alterations, repairs, or additions regulated by Subsection 2 of this section.
4. Location within dwelling units. In dwelling units, a detector shall be installed in each sleeping room and at a point centrally located in the corridor or area giving access to each separate sleeping area. When the dwelling unit has more than one story and in dwellings with basements, a detector shall be installed on each story and in the basement. In dwelling units where a story or basement is split into two or more levels, the smoke detector shall be installed on the upper level, except that when the lower level contains a sleeping area, a detector shall be installed on each level. When sleeping rooms are on an upper level, the detector shall be placed on the ceiling of the upper level in close proximity to the stairway. In dwelling units where the ceiling height of a room open to the hallway serving the bedrooms exceeds that of the hallway by 24" or more, smoke detectors shall be installed in the hallway and in the adjacent room. Detectors shall sound an alarm audible in all sleeping areas of the dwelling unit.

SMOKE DETECTOR DECLARATION
