RE: 3600 Stockton Blvd. Owner TI/Repairs, Permit #9900086C

Gentlemen:

This letter is in response to verbal inspector(s) comments regarding the above permit work. The work is being done due to an auto ramming the NE building corner at 11th Avenue, storefront remodel, interior fix-up, wood dry-rot and pest destruction repair, and desire to improve and preserve the original building design. The following addresses the various inspector(s) comments:

1. Front Wall Stucco/Sidewalk Joint: The existing stucco wall goes down to the top back of the sidewalk. The owner wishes the remodeled the storefront to match the existing stucco. Since the sidewalk slopes away from the building, this is an acceptable remodel and repair method. Flashing and sealing will be done before stucco is added.
2. 4x6 Window Framing: The windows are framed with top flat 4x6 members to match the 4x6 mullions. The top flat 4x6 is not structural, since the original steel post carries the roof-supported beam above the transom style windows. All window framing is for architectural purposes to retain the original Stockton Blvd. flavor. The non-structural bolted spliced 4x6 over the doorway is acceptable.
3. Northeast Corner Wall Repair: This is the area of auto and pest damage. The original mudsill is slightly lower than the present back of sidewalk, creating a shallow recess. Damaged studs have been or will be replaced. Removing the entire wall and filling the shallow recess with concrete is not necessary since the replacement stucco will be similar to the storefront work noted in Item 1. A second mudsill or blocking can be placed over the original sill for plywood bottom edge nailing.
4. Wall Reinforcement: The remodel work includes adding new studs and posts at critical locations to reinforce damaged or weakened wall studs. I have also recommended retrofit strapping and other minor fixes. The work I observed appears acceptable.
5. Rear Sidewalk and Parking: The owner is replacing the rear driveway and broken sidewalk sections. The existing side and rear stucco/sidewalk or drive joints can be similar to those noted in Item 1 since all drainage slopes away from the building.

Please contact me should you have any questions on this letter or the store remodel.

Very truly yours,
A. A. Lind
