Honorable Members in Session:

SUBJECT: Resolution Approving Negative Declaration for Amador Avenue Sanitary Sewer and Water Assessment District

SUMMARY:

The Environmental Coordinator has reviewed the subject project and finds that it will not have a significant adverse effect on the physical environment and therefore recommends that the project and a Negative Declaration be approved by the City Council.

BACKGROUND:

In accordance with State EIR Guidelines for Implementation of the California Environmental Quality Act of 1970, dated December 1976, an Initial Study was performed. As a result of this study, it was determined that the Amador Avenue Sanitary Sewer and Water Assessment District would not have a significant adverse effect on the physical environment and a draft Negative Declaration was prepared. On July 27, 1981 the Negative Declaration was filed with the County. On July 31, 1981 Notice of Opportunity for Public Review of the draft Negative Declaration was published in The Sacramento Union. The appropriate length of time has elapsed for receipt of comments regarding the Negative Declaration, with no comments having been received.

RECOMMENDATION:

The Environmental Coordinator recommends that the attached resolution be passed which will:

1. Determine that the proposed project will not have a significant effect on the environment.
2. Approve the Negative Declaration.

(A project may impact on two or more separate resources where the impact on each resource is relatively small, but where the effect of the total of those impacts on the environment is significant.	—	—	<u>X</u>
d. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	—	—	<u>X</u>

III. DISCUSSION OF ENVIRONMENTAL EVALUATION (any "yes" or "maybe" answers must be explained - attached additional sheets if necessary)

- 1. b. The installation of the sanitary sewer and water main will require excavation of the street and disruption of the soil. Since the work will be accomplished within the street, there will be no additional overcovering.
- 2. a. During the construction of the project, there may be some deterioration of the ambient air quality.
- 6. a. There will be an increase in the existing noise level during construction, resulting from the equipment required for the construction.
- 14. c & d The project will result in future maintenance of the sewer and water systems. However, the additional effort required is considered to be insignificant with respect to the total requirements of the City.

IV. Mitigation measures proposed to minimize environmental impacts for the project as identified above. (Explain in detail - if none, so state)

- 1. b. None
- 2. a. The dust and dirt problem will be controlled by the normal dust management practice of dampening the work site.
- 6. a. None
- 14. c. & d. None
