SUPERVISING CONSTRUCTION INSPECTOR

Nature of Work:

Under direction, to supervise, direct and occasionally perform the construction inspection of public improvements including streets, gutters, roads, bridges, and drainage structures required for subdivision and commercial development to insure compliance with applicable laws, ordinances, standards, plans, and specifications. An employee in this class supervises other construction inspectors and engineering survey parties engaged in the inspection of highway and street public improvements. He coordinates the inspection work, and may personally inspect the more difficult and complex phases of this type of construction.

Illustrative Examples of Work:

- Assigns and supervises inspectors according to project requirements.
- Audits field performance of inspectors to confirm accuracy of inspection and conformance with contract provisions, plans, specifications, and sound construction practices.
- Interprets and explains project plans and specifications.
- Confers with inspectors and other concerning contract disputes or problems.
- Makes estimates for progress payments to contractors.
- Provides reports as required concerning inspection work, construction progress, and other matters concerning construction.
- Trains new inspectors, investigates complaints, occasionally inspects the more difficult and complex phases of construction.
- Performs other related work as required.

Knowledges, Abilities, and Skills:

- Considerable knowledge of the materials and methods used in the construction and installation of streets, gutters, storm drains, culverts, and related public works facilities installed on public rights of way.
- Good knowledge of tools, instruments, and equipment used in public works construction.
- Good knowledge of paving methods and materials.
- Good knowledge of soil conditions, types and formations.
- Ability to apply general construction knowledge to varied and complex situations.
- Knowledge of the principles of effective supervision, and ability to direct the work of others.
- Ability to detect flaws in construction material; ability to keep records and make simple drawings and reports.
- Ability to deal tactfully and effectively with contractors, workmen, and the general public.

Desirable Experience and Training:

Any combination of training and experience equivalent to completion of the 12th grade and five (5) years of experience in general construction as contractor's foreman or superintendent, or as an inspector of highway or street construction. (Additional college level training may be substituted for experience on the basis of 16 units of engineering and mathematics courses for one year of experience.)

DEPUTY CITY COLLECTOR

Nature of Work:

This is specialized technical and administrative work in providing assistance to the City Collector in the overall operation of the Collector's office, including the interpretation of tax laws and license ordinances, the collection of city taxes and license fees, and with special emphasis on the collection of all unpaid delinquent bills, claims, and other fees. Work is performed under the general supervision of the City Collector, but the employee has considerable latitude for independent decisions and actions within the framework of laws, ordinances, and broad policies approved by the City Collector.

Illustrative Examples of Work:

Receives all delinquent bills, claims and other items from the City Controller and takes all necessary steps for collection, including the filing of legal proceedings and testifying in court.
