Re: Clarification of Detail 9/SD3  
Creekside at Natomas, Sacramento, Calif.

Dear Mr. Midgley,

This letter is written in response to a field question you brought to our attention on October 22, 2003. The question and our response are listed below:

- Q. With regards to detail 9/SD3, if an LVL rim board and a TJI joist are installed side by side between the posts, does a web stiffener still need to be used for the TJI joist, as shown in the detail.
- A. As long as the LVL rim is between the posts being strapped together per detail 9/SD3, then a web stiffener is not required at the TJI joist.

If you have questions on any of the above, please contact our office.

Sincerely,

---

John A. Di Vittorio, P.E.

RE: Sufficient drainage to secure Building Final

4852 W Wainate Dr  
0310913

Building Official,

In addressing your concern regarding suffenant overland release and proper drainage, we at KBHome understand the necessity for atticquite flow. However, due to recent storms and the over saturation of the soils we are having difficulty meeting the required drainage in certain areas of the property. It is our intention and obligation that once we have the ability to complete the drainage system to industry standards, all areas of concern will be addressed. Also, KBHome has a commitment to customer satisfaction and respects the leniency in this manner given by the Building Department. We are asking that the following lot(s) be given this consideration.
