SUBJECT: Reroof at 3517 Sagehen Way, Sacramento, CA 95762

Rigo:

On May 5th 2003 I inspected the roof structure of the residence at the above mentioned address. The roof was made up of metal plated trusses with 2x4 Douglas fir No. 1 top chords @ 2' o.c. The garage truss was a truncated 4 panel "W" truss with a span of 20' exterior wall plate to exterior wall plate, and a span of 14' from plate to ridge. The main house truss was a 6 panel "W" truss with a king post that spanned 40' exterior wall plate to exterior wall plate. There were some 2x6 rafters @ 2' o.c. spanning 2' in the entry porch roof that were supported at the lower end with a 4x12 beam spanning 6'. The roof slope was 5:12.

It is my finding that this structure is adequate for the following: 30lb. tarred felt installed over the existing plywood sheathing; 1x2 batts; Lightweight concrete tile weighing 6 lbs./sq.ft.

NOTE: it is possible when reroofing that the increased load to structural elements also supporting walls, ceiling and floor finishes could cause some minor cosmetic cracking of these finishes. This is typical of wood framed structures and does not of itself indicate structural inadequacy of these members.

This report deals with the structural adequacy of roof supporting members that were readily observable. It does not address any structure that was covered by wall finishes, buried in the ground or was otherwise not observable. Any such structures were assumed to conform to standard construction specifications in the Uniform Building Code. Also, it does not address any existing deflection or warping of roof surfaces, nor is it guaranteed that any structural modifications that may be listed in this report will remove such deflections or warping. The repair of such deflections or warping to improve architectural appearance is at the option of the building owner and the roofing contractor.

This report has been prepared for the sole benefit of the individual to whom it is addressed. The use or reliance on this report by any other individuals or entities without the expressed written consent of the above addressee and Schoen Engineering is forbidden. This does not preclude a licensed contractor acting as an agent for the addressee from using this report to obtain a building permit if the addressee is the home owner.

I would like to thank you for allowing me to provide my services in this matter. Please let me know if I may be of further assistance.

Sincerely,

Mark S. Schoen P.E.
