Sacramento, California

Honorable Members in Session:

SUBJECT: Approval of Plans and Specifications and Request for Bid for
the Purchase of 1,000 feet 42" Diameter Pipe

SUMMARY

The Division of Water & Sewers has prepared plans and specifications for the subject project. It is recommended that the plans and specifications be approved and the project be advertised for bid.

BACKGROUND

The City is presently constructing a 42" diameter water transmission main on the old Sacramento Northern Railroad Bridge. This is part of an overall project to provide surface water to North Sacramento. The next portion of this project will be to make a connection at 18th and North B Streets and proceed north to the railroad bridge. It has been determined that the City should prepurchase the first 1,000 feet of this pipe in order to avoid construction in the vicinity of the Almond Growers Exchange during the peak of almond harvest season.

FINANCIAL DATA

This project is included in the 1977-78 Water Distribution Budget 4-13-3030-1568-4820; the estimated purchase cost is \$30,000.

RECOMMENDATION

It is recommended that the plans and specifications be approved and that bids be received on May 6, 1980.

Respectfully submitted,

Harry G. Behrens
