City Council
Sacramento, California

Honorable Members in Session:

SUBJECT: SUMP 101 VALVE VAULT CONSTRUCTION (PN:WE81) - PROJECT APPROVAL AND BID ADVERTISEMENT; TRANSFER OF STORM DRAINAGE FUNDS (\$85,000)

LOCATION AND COUNCIL DISTRICT

This project is located at the Sump 101 site, J St. and Elvas Ave. near the SPRR tracks adjacent to the California State University Sacramento (District 3).

RECOMMENDATION

It is recommended that the City Council approve the specifications for this project and authorize the City Clerk to advertise for bids to be received on March 3, 1993, and authorize the transfer of \$85,000 to Sump 101 Rehab (CIP #WE81) from "storm drainage fund Base CIP Reserve (CIP #WE71).

CONTACT PERSON: Terry Paxton, Supervising Engineer, 433-6619

FOR COUNCIL MEETING OF: February 2, 1993

SUMMARY

Specifications for this project have been prepared. Approval of the specifications and authorization to advertise for bids is recommended.

COMMITTEE/COMMISSION ACTION

None applicable

BACKGROUND INFORMATION

The Department of Utilities operates Sump 101 which is used to pump storm water runoff into the American River during storm events. Currently, the large diameter check valves, which prevent backward flow and siphoning, are buried in the ground. As a result, problems with these check valves are difficult to identify, and costly to repair. With this project, a concrete, subterranean vault will be constructed around the check valves with removable steel covers over the valves. Upon completion of this project, leaks, and other valve problems will be easily found through routine inspection avoiding the costly inspection now necessary. The vault should also extend the service life of these very costly valves.

The Environmental Services Division has reviewed this project and has determined it to be categorically exempt.

FINANCIAL CONSIDERATIONS

The total project is estimated to cost \$129,400, including planning, design, and construction. The current unobligated budget in the Sump 101 Rehab Project is \$46,094 (425-500-WE81-4820). It is recommended that \$85,000 be transferred to CIP #WE81 from the Storm Drainage Fund Base CIP Reserve (425-500-WE71-4414), in which there is an unobligated budget of \$1,036,646 as of January 12, 1993. This transfer will not impact storm drainage rates because the budgets of these projects have been approved.

A non-refundable fee of \$30 will be charged for each set of plans and specifications to offset the cost of reproduction.

POLICY CONSIDERATIONS

This action is consistent with Chapter 58, Article III, Section 58.301 of the City Code concerning advertisement for bid.

City Council
January 27, 1993
Sump 101 Valve Vault Construction

MBE/WBE EFFORTS

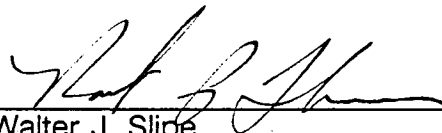

Plans and specifications will be sent to nineteen (19) plan rooms and construction services organizations for publication and use by the construction industry of Northern California. There are four (4) organizations on the distribution list that are directly involved with MBE/WBE contractors.

Respectfully submitted,

Donald M. Dodge
Director of Utilities
