Re: Kimball Hill Homes
Natomas Crossing
Plan 2156

Dear Sir or Madam:

It has been brought to my attention that some of the TJI Pro 250 series, 14" floor joists (16'-0" span) have sustained some web damage due to a 6" and 4" dia. hole being placed at a distance of 12" and 14" respectively from a bearing point. These holes do not affect the top or bottom flanges. No repair is required for the 4" dia. hole. As a repair for the 6" dia. hole, insert 1/2" plywood filler between the flanges and attach 1/4" cdx plywood or O.S.B. (14" deep x 1'-0" long) glued and nailed to each face at the top and bottom flanges using 8d common wire nails spaced at 4" o.c. per face.

If you have any other questions, please feel free to call.

Sincerely,

Richard M. Robertson, P.E.
