ZONING ADMINISTRATOR  
1231 I Street, Sacramento, CA 95814**

**ACTION OF THE ZONING ADMINISTRATOR**

On Wednesday, October 29, 1997, the Zoning Administrator approved with conditions a special permit to add wireless antennas on an existing communications monopole for the project known as Z97-054. Findings of Fact and conditions of approval for the project are listed on pages 2-3.

**Project Information**

**Request:** Zoning Administrator Special Permit Modification to add three additional wireless antenna panels at a height of 45 feet an existing 60 foot monopole on 3.78± developed acres in the Light Industrial (M-1) zone.

**Location:** 2150 Bell Avenue (D2, Area 4)

**Assessor's Parcel Number:** 238-0130-023

**Applicant:** Smart SMR of California, Inc., dba Nextel Communications (Ken Stockero)

Previous Files: P92-056

Background Information: On June 12, 1992, the Planning Director approved a Special Permit to locate a 73 foot high cellular antenna with a monopole and a 326 square foot communications shelter in the M-1 zone (P92-056). A 60 foot high monopole was installed instead, which was lower than the approved height.

Additional Information: The applicant proposes to attach three close proximity antenna panels to an existing 60 foot wireless monopole. The antenna panels will be mounted at 45 feet, below the existing Airtouch antenna panels. The applicant will construct a 10 foot by 20 foot equipment building (200 square feet) north of the tower. Any cellular equipment (antennas) which both receives and transmits that is attached to existing monopoles requires a Zoning Administrator's Special Permit according to the Zoning Ordinance.

The site is located within the Robla Community Association neighborhood group areas. The proposed plans were submitted to the neighborhood association and staff received no comments. The project has been noticed and staff received one call. The adjacent property owner claimed that when the original monopole was installed with its access driveway that the drainage and grading was improperly done resulting in a flooding problem for the adjacent property. Staff informed the caller to file a complaint with the Building Division.

Environmental Determination: This project will not have a significant effect on the environment and is exempt from environmental review pursuant to State EIR Guidelines {California Environmental Quality Act, Section 15301(e)}.

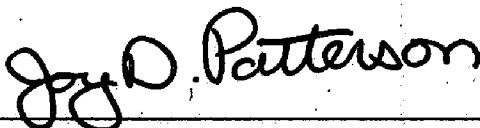

Conditions of Approval

1. Size and location of the panels shall conform to the revised plans submitted. The panels shall be painted to match the tower structure. The applicant shall use non-reflective paint on all equipment on the tower to prevent glare. Everything on the tower, both new and old, including cables, brackets, supports, etc. shall be painted to match the tower.
2. Any additional antennas shall require a modification of the Special Permit. {3 antenna panels are approved}
3. The applicant shall obtain all necessary building permits prior to commencing construction.
4. Should the applicant every discontinue using the pole for cellular services then the applicant shall remove all equipment on the tower and the equipment shelter within six months of termination.

5. The proposed cable run from the tower to the equipment building shall be at ground level or underground.
6. The applicant shall comply with the Mitigation Monitoring Plan from P92-056 regarding cultural artifacts (see Exhibit C).

Findings of Fact:

1. The proposed project, as conditioned, is based upon sound principles of land use in that the wireless equipment will be added inconspicuously to an existing 60 foot high communications monopole with other wireless communication equipment.
2. The project will not be detrimental to the public health, safety, or welfare nor result in a nuisance in that:
  - a. the proposed wireless antenna panels will be attached to an existing 60 foot high monopole; and
  - b. the design and location of the antenna panels will not significantly impact the surrounding commercial and industrial area.
3. The project is consistent with the General Plan and the North Sacramento Community Plan which designate the subject site as Heavy Commercial or Warehouse and Labor Intensive, respectively.

Joy D. Patterson  
Zoning Administrator

A use for which a Special Permit is granted must be established within two years after such permit is approved. If such use is not so established the Special Permit shall be deemed to have expired and shall be null and void. A Special Permit use which requires a Building Permit shall be deemed established when such Building Permit is secured and construction thereunder physically commenced. If no building permit is required, the use shall be deemed established when the activity permitted has been commenced.

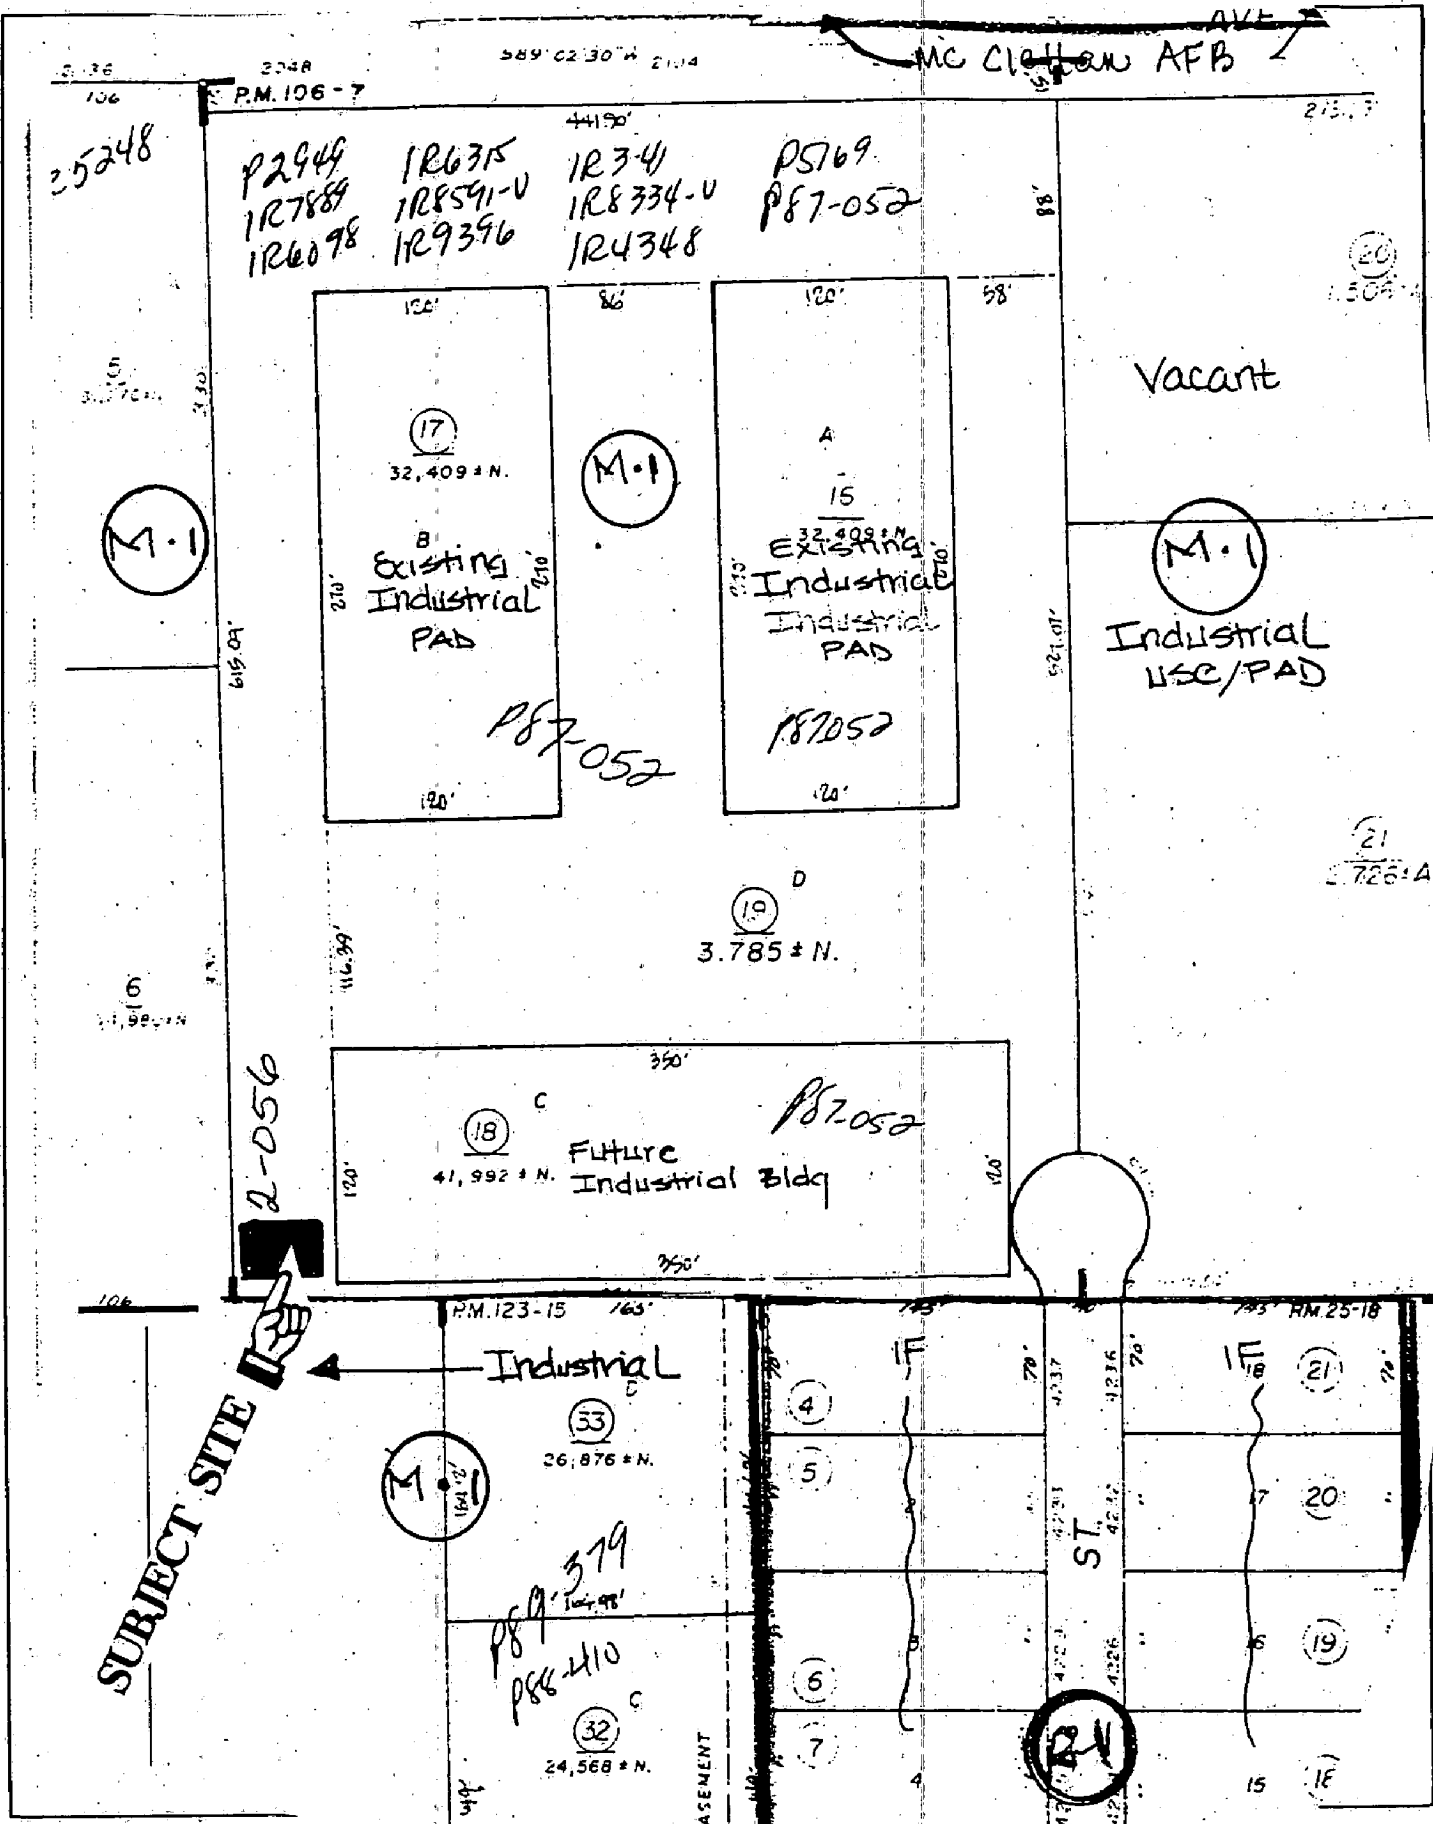

The decision of the Zoning Administrator may be appealed to the Planning Commission. An appeal must be filed within 10 days of the Zoning Administrator's hearing. If an appeal is not filed, the action of the Zoning Administrator is final.

## MITIGATION MONITORING PLAN

### Introduction

This Mitigation Monitoring Plan has been required and prepared by the Department of Planning and Development, Environmental Services Division, 1231 I Street, Suite 301, Sacramento, CA 95814, (916) 264-7037, pursuant to California Environmental Quality Act Guidelines Section 21081.

The intent of the Plan is to prescribe and enforce a means for properly and successfully implementing the mitigation measures as identified within the Negative Declaration for this project. Unless otherwise noted, the cost of implementing the mitigation measures as prescribed by this Plan shall be funded by the applicant.

### Legal Description

PARCEL NO. #238-0130-019

### Project Description

The proposed project is requesting a Planning Director's Special Permit to erect a 75 foot high monopole. The project design includes a 12' by 28' precast concrete communication's shelter.

### A. Cultural Resources

If subsurface archaeological or historical remains (including unusual amounts of bones, stones, or shells) are discovered during excavation or construction of the site, work shall stop immediately and a qualified archaeologist and a representative of the Native American Heritage Commission shall be consulted to develop, if necessary, further mitigation measures to reduce any archaeological impact to a less-than-significant level before construction continues.

### ENTITY RESPONSIBLE FOR ENSURING COMPLIANCE

Department of Planning and Development, City of Sacramento  
Department of Public Works, City of Sacramento

### MONITORING PROGRAM

Both the Public Improvement plans and the building plans shall be noted to state that work shall be stopped and an archaeologist shall be consulted in the event that any archaeological materials are found.

If subsurface archaeological or historical remains (including unusual amounts of bones, stones, or shells) are discovered during excavation or construction of the site, work shall stop immediately and a qualified archaeologist and a representative of the Native American Heritage

Commission shall be consulted to develop, if necessary, further mitigation measures to reduce any archaeological impact to a less-than-significant level before construction continues.

Site inspections by the Building Division and the Department of Public Works shall watch for any potential archeological resources during site visits. A City contact person shall be notified (in Permit Services) in case of an archeological discovery. The Building Division shall attach this requirement to the approved permit plans and include this measure as a random inspection item on the Special Conditions Attachment.
