* Committee member Shore arrived at 1:37 p.m.

Mr. Holmen stated that the City Planning Commission recommendations are as follows: 1) Facilities with fewer than six persons should not be researched or analyzed 2) Placing caps on facilities would not be appropriate 3) Focused studies of known problem type facilities would be beneficial to the City Council in reaching decisions on individual projects.

Committee member Kastanis responded that locational criteria for social service agencies need to be refined. He also suggested that the localization criteria be prioritized and the concentration issue be addressed more clearly.
