Re. Asbestos Testing at Old Shakey's Building at 5641 J Street in Sacramento, CA.

Dear Mr. Thompson

At your request RichMarc environmental Consultants provided the services of as Certified Asbestos Consultant (CAC) at the above location on Tuesday, July 18, 2000. The services included the collection of bulk samples, delivery of the bulk samples to an accredited laboratory for analysis, travel and a written report with findings and recommendations.

It is our understanding the building is planned for extensive renovation and the concern is whether or not there is asbestos containing materials in the building. Upon arriving on site and inspecting the areas of construction, it was determined that numerous building materials would require testing. The materials that would require testing for asbestos included the flooring materials throughout the location, the wall systems throughout the location (including plaster and drywall), and various miscellaneous materials including roofing materials, wire covering and insulation materials.

A total of 21 bulk samples were collected and delivered to a NVLAP accredited laboratory for analysis by Polarized Light Microscopy (PLM). Out of the 21 bulk samples that were analyzed, 13 were positive for asbestos. The materials that contain asbestos were as follows: the drywall composite materials throughout the location, the floor tile and mastic in the restrooms and kitchen areas, and the penetration mastic on the upper portion of the roof. All analytical results and sampling data sheets are included herein for your review.

It is our recommendation that all asbestos containing materials be removed by a Certified Asbestos Abatement Contractor from the building prior to renovation activities. Furthermore, it is recommended that a third-party consultant be contracted to provide periodic and clearance air monitoring for potential liability issues. If there are any questions or comments regarding this report please contact our office immediately. Thank you very much for your consideration.

Sincerely,

Marc A Sallin, CAC 97-2307
