NEWS No. 7.

7."A few years ago your newsBOY was present at one of your open meetings. You took the names of people that wanted to talk. All but two or three min. were used with positive information. My negative remarks were interrupted as your people started walking out."

The people involved in the various programs might have been willing to talk for two or three hours more about the results of their programs.

BUT, with the work that Area4 on Adult Aging, it would seem THAT YOU WOULD REALLY WANT to know what is not working, or something that would improve a current program.
