Dear Rod:

Per your request, CS Engineering is submitting this letter in response to the proposed framing modifications at the subject project. In particular, I shall address the existing masonry walls (versus the wood walls shown on the approved drawings).

It is my professional opinion, based upon a review of the drawings and calculations, that the proposed framing modifications are structurally acceptable as long as the following criteria are met:

- All framing shall be installed as shown on the drawings.
- Contractor shall ensure that all beams rest on full bearing.
- At the holdown locations, a post is to be installed with the corresponding holdown at the existing foundation. For PHD6 holdowns, a 7/8" all-thread rod shall be embedded into the existing footing 7.75" with Simpson SET epoxy. For all PHD2 holdowns [ to be located at each MST37 strap holdown], a 5/8" all-thread rod shall be embedded 5" with SET epoxy.

Please call if you have any questions/concerns regarding the items above. For your convenience, two additional, stamped and signed, copies are enclosed for review by the Building Inspector.

Sincerely,

  
Charles Sinkey Jr. S.E.
