Size of Building—Length _____ Width _____ Height _____

It is hereby agreed that this building will be constructed in conformity with the Ordinances of the City of Sacramento and the Laws of the State of California.

ESTIMATED COST, \$ 475-

P. Kelley
Owner or Owner's Representative.

Plans must be submitted

1. The first step in the process of identifying a problem is to recognize that a problem exists. This is often done by comparing current performance to a desired state or goal.

2. Once a problem is identified, the next step is to define the problem more precisely. This involves identifying the causes of the problem and the scope of the problem.

3. The third step is to generate potential solutions. This is often done by brainstorming or using a structured problem-solving process.

4. The fourth step is to evaluate the potential solutions. This involves comparing the solutions to the problem and to each other.

5. The fifth step is to select a solution. This is often done by choosing the solution that is most likely to be successful.

6. The sixth step is to implement the solution. This involves putting the solution into action.

7. The seventh step is to evaluate the results. This involves comparing the results to the desired state or goal.

8. The eighth step is to adjust the solution if necessary. This involves making changes to the solution if it is not working.

9. The ninth step is to monitor the solution. This involves keeping track of the solution over time.

10. The tenth step is to document the solution. This involves recording the solution and the results.

11. The eleventh step is to share the solution. This involves telling others about the solution.

12. The twelfth step is to learn from the solution. This involves reflecting on the solution and what was learned.

13. The thirteenth step is to apply the solution. This involves using the solution in other situations.
