June 17, 1981

R. H. PARKER  
CITY ENGINEER  
J. F. VAROZZA  
ASSISTANT CITY ENGINEER

City Council  
Sacramento, California

Honorable Members in Session:

**SUBJECT:** Approval of Plans and Specifications for Replacement of Drainage  
Line in Ellen Street and Portion of Glenrose Avenue

SUMMARY:

The City Engineer's office has prepared plans and specifications for the subject project. Copies of said plans and specifications have been forwarded to the City Clerk and approval is recommended.

BACKGROUND:

The existing 10" concrete drainage line in Ellen Street has deteriorated to the extent that flooding is caused on Ellen Street. Water flows from the outlet of the existing pipe into an unimproved roadside area causing further flooding. High maintenance costs are encountered in attempting to keep this deteriorating system functional.

It is recommended that the deteriorated 10" drain line be replaced with a new 12" Reinforced Concrete Pipe, and that the new drain pipe be connected to an existing storm main in Del Paso Boulevard to resolve the flooding problem.

The project was approved by the Budget and Finance Committee on November 3, 1980 and by the City Council on November 12, 1980.

FINANCIAL DATA:

It is estimated that the project will cost approximately \$34,100.00. It is proposed that funding be provided from the Sewer Fund Balance. An appropriation of funds will be requested following receipt of bids.

RECOMMENDATION:

The City Engineer recommends that the plans and specifications be approved and that bids be received on July 14, 1981.

Recommendation Approved:

*Walter J. Slipe*  
Walter J. Slipe, City Manager

Respectfully submitted,  
*R. H. Parker*  
R. H. PARKER  
City Engineer
