APPLICATION: Planning Director's Special Permit Modification to expand an existing school by creating office and retail space in an existing 23,328 square foot building and using an adjacent paved parcel to provide eight parking spaces on 0.42± developed acres in the General Commercial (C-2) zone.

LOCATION: 3455 5th Avenue
McGeorge School of Law, University of the Pacific

BACKGROUND INFORMATION:

On May 25, 1971, the Planning Commission approved a Special Permit (P4657) which established a Master Plan for McGeorge Law School Campus. This master plan included the area bounded by Donner Way, 32nd Street, 33rd Street, and 5th Avenue as well as the two lots north of 5th Avenue. Since 1971, the Planning Commission has approved several special permits which have expanded the school by adding additional classroom space, housing, and parking. In June of 1990, a Planning Director's Special Permit Modification was approved for a 2,594 square foot office space addition to the campus. An additional Planning Director's Special Permit Modification was approved for a 973± square foot addition to the existing library facilities on January 8, 1991.

SUMMARY:

The applicant proposes to convert an existing 23,328 square foot building that was originally used for retail uses on the ground floor and as a meeting hall on the second floor to provide office space for the McGeorge School of Law's Institute for Administrative Justice on the second floor and future retail space on the first floor (see Exhibits A, B, and C). The adjacent parcel to the west is currently paved and has been used for parking. It will be striped to be used for eight parking spaces. Therefore, a Planning Director's Special Permit Modification is required for this expansion.

ANALYSIS:

Staff has no objection to the building conversion and use of the adjacent parcel for parking. The proposed expansion will provide additional office space on the second floor for legal services, hearing rooms, and associated uses required by the Institute of Administrative Justice. There will not be any regular academic training of law students in the proposed office space. The first floor will eventually be leased out for retail or office space.

The applicant proposes to continue using the adjacent paved area to the west for eight parking spaces. Staff recommends the area be striped to meet the Zoning Ordinance requirements for parking stalls. The building was previously used as a meeting hall and retail space which has a higher parking requirement. The proposed uses would not require as many spaces and would be credited with more parking than required based on the previous use.

RECOMMENDATION:

Staff recommends the Planning Director approve the Special Permit Modification to expand an existing school by creating office and retail space in an existing 23,328 square foot building and using the adjacent paved parcel to provide eight parking spaces subject to conditions and based upon findings of fact which follow.

Conditions

1. Any other improvements or structures to be located on the parcel will require an additional special permit modification.
2. The building conversion and parking lot (only the approved area as indicated in Exhibit A) shall conform to the submitted plans and have building permits. The parking stalls shall meet the requirements of the Zoning Ordinance.

Findings of Fact

1. The project, as conditioned, is based upon sound principles of land use in that the building and parking area already exist and are compatible with the surrounding office and residential development in the area.
2. The project, as conditioned, will not be detrimental to the public welfare in that the new uses will be less intense than previous building uses and additional off street parking will be provided.
3. The project is consistent with the General Plan which designates the site as Community Neighborhood Commercial and Offices.
