PROJECT EVALUATION: Staff has the following comments:

- A. The subject site is a 3,200 sq.ft lot which is developed with a vacant print shop. The site is zoned General Commercial (C-2) and is designated for commercial uses on both the General Plan and the 1980 Central City Community Plan. Surrounding uses include offices, general commercial and Business 80 freeway.
- B. The applicant is proposing to remodel the existing vacant print shop into a graphic design studio/office. The existing building is 2,170 sq. ft. in size. The proposed use is similar to the previous use, however the Zoning Ordinance requires five spaces be provided for the proposed graphic design studio/office. Only three parking spaces are located on site. The applicant is therefore requesting a variance to waive two required parking spaces.

Staff has reviewed the variance request and has no objection to the granting of the variance. Based on the fact that the proposed use is similar in nature to the former use of the site; that the lot is substandard in size; and size; and that the lot is already developed with a commercial structure.

In addition, staff observed the on - street parking along "S" street and 29th Street have a two hour parking time limit.

Staff therefore concludes from the above data that the waiver of two parking spaces would not significantly increase the on street parking demand in the immediate area.

- C. The proposed has been reviewed by the Traffic, Fire and Building Inspection Divisions. No comments have been received.

ENVIRONMENTAL DETERMINATION: The project is exempt from environmental review pursuant to the State EIR Guidelines (CEQA, Section 15311b).

RECOMMENDATION: Staff recommends the following:

Approve the variance based upon the findings of fact which follow.

Findings of Fact

1. Granting the variance does not constitute a special privilege extended an individual applicant in that:
  - a. Similar parking variances have been granted for similar projects in other localities in the Central City.
  - b. The subject site is substandard in shape and is built upon, making strict adherence to the Zoning Ordinance a hardship.
2. Granting the request does not constitute a use variance, in that the site is zoned for commercial uses.

0 

001567

3. Granting the variance is not injurrouis to public welfare or to public welfare or to property is the vecinity, in that:

It will not significantly alter the commerical characteristics of the neighborhood, or increase the on-street parking demand.

4. Granting the variance is compatible with the 1974 General Plan and the 1980 Central City Plan which designate the site for commerical uses.
