As a Transportation Engineer, I believe that we can bring vibrancy and economic stimulus to the region by providing alternative modes of transportation that are safe, efficient and environmentally friendly. I believe that providing non-automobile options to the public will free downtown from traffic congestion and encourage more public to visit and shop at downtown. Given the impetus provided by the downtown arena, it is high-time that we engage in partnership with West Sacramento and other stakeholders in preparing a blueprint for a modern street car system that can connect communities to the recreation and business centers. With over 25 years of transportation engineering experience dealing with the federal, state and local government, regulatory agencies, various statewide Boards and Commissions, serving on the

Sacramento County Planning Commission, I believe that I can contribute to this cause to becoming reality.

I'm interested in contributing toward the growth and development of Sacramento. I've been a resident since 1989 and have lived in numerous locations. The Downtown area has the potential to become something special. As I travel to places like Denver, Colorado and other places with similar demographics I see how they develop their downtown areas to be significant and unique. I fee the Street car can be one of many projects that begin to elevate our city and allow it to be recognizes as a growing metropolitan area second to none. I'd like to be a well rounded voice in the process and effort to make this project come to life.
