Re: W*M Store #2598
Sacramento, CA

Dear Mr. Roggy:

We have reviewed the new location of the condenser rack from RFI #7. The existing structure is capable of supporting the rack in the new location without additional joist reinforcement. Since the pipes for the rack were placed within three inches of a top chord panel point, additional angles per 8-S1 are not required.

If you should have any questions, please call.

Sincerely,

Nicholas R. Kufeldt

Dear Mr. Bolinger:

During construction of the subject project, personnel of our firm provided special inspection services in general conformance with Section 1701 of the Uniform Building Code. These construction observation services were performed from February 1, 2006 through March 5, 2006. The scope of our services consisted of testing and observation for the following items:

- **Cast-in-place Concrete**
- **Structural Steel Welding**
- **Bolts installed in concrete**
- **Reinforcing Steel**
- **Epoxied Anchors**

Based on the construction observations and testing of our representatives, it is our opinion the work observed requiring special inspection was, to the best of our inspector's knowledge, in conformance with the approved plans and specifications. Our services did not include architectural detailing observations such as dimensioning, color, fit, or finish.

We have performed our services in a manner consistent with the level of care and skill ordinarily exercised by inspection firms practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. Our services have been completed within the responsibilities, authority, and legal protection of an agency Deputy Inspector.

If you have any questions regarding the contents of this report or require additional information, please contact this office.

Sincerely,
