City Council
Sacramento, California

Honorable Members in Session:

**SUBJECT: SUMP 10 - RELINING OF OUTFALL PIPES (PN: WE23): AWARD CONTRACT TO
INSITUFORM TECHNOLOGIES, INC., FOR AN AMOUNT NOT TO EXCEED
\$149,936.**

LOCATION AND COUNCIL DISTRICT:

The City pump station, Sump 10, is located at 5105 Sandburg Drive in Council District 3 (see attached location map).

RECOMMENDATION:

Staff recommends that the City Council accept the low bid from Insituform Technologies, Inc., for an amount not to exceed \$149,936 and award the contract.

CONTACT PERSON:

Gary Reents, Engineering Services Manager, 264-1433
Andrew A. Hunt, Senior Engineer, 264-1408

FOR COUNCIL MEETING OF: August 31, 1999

SUMMARY

A bid was received from one (1) contractor and opened by the City Clerk on August 11, 1999. The bidder was Insituform Technologies, Inc., with a bid of \$149,936. The ESBD goals were waived, due to the minimal amount of possible subcontract work. It is therefore proposed to award the contract to Insituform Technologies, Inc., for \$149,936.

COMMITTEE/COMMISSION ACTION

None.

BACKGROUND

- Sump 10 is located at 5105 Sandburg Drive.
- The Sump 10 pump station was part of a 1997 Pump Station Outfall Study prepared by CH2MHill. It was placed on a top priority list for improvements by CH2MHill because the four 24-in diameter welded steel outfall pipes at Sump 10 are in very poor condition. The linings in all four outfalls have failed, and there is both interior and exterior corrosion. The continued deterioration of the outfall pipes could threaten the structural integrity of the river levee.
- Approximately 455 lineal feet of welded steel pipe will be relined using the cured-in place pipe (CIPP).
- A bid was received from one (1) contractor as follows:

Insituform Technologies, Inc.	\$149,936
-------------------------------	-----------
- The engineer's estimated construction cost was \$155,000. The estimated completion date is December 1, 1999.

FINANCIAL CONSIDERATIONS

The total project cost including design, construction, inspection and contingency is \$170,000. As of August 12, 1999, the unobligated balance available for this project (PN:WE23) is \$ 300,341. which is sufficient for award.

ENVIRONMENTAL DETERMINATION

The project has been determined to be exempt from the provisions of the California Environmental Quality Act (CEQA) under Section 15301(b). The project will result in repair of an existing public facility with no expansion of the use beyond that existing. The pipe lining project will be undertaken within the existing piping and does not involve physical disturbance to the surrounding environment.

City Council
August 31, 1999
SUMP 10 - RELINING OF OUTFALL PIPES (PN: WE23)

POLICY CONSIDERATIONS

This action is consistent with Chapter 58, Article III, Section 58.03.304 of the City Code concerning award of contracts.

ESBD CONSIDERATIONS

Approved by the office of Small Business Development, the participation goals of 20% for emerging and small business enterprises as required by Ordinance 99-007 and Resolution 99-055, relating to ESBD participation goals and policies, adopted by the City Council on February 9, 1999 were reduced to 0%. The ESBD goals were reduced, due to specialized nature and the minimal amount of possible subcontract work. The responsive bidder, Insituform Technologies, Inc., achieved an ESBE participation level of 6%.

Respectfully submitted,

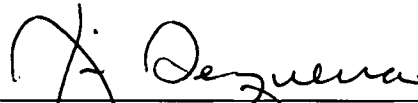

Gary A. Reents
Engineering Services Manager

RECOMMENDATION APPROVED:

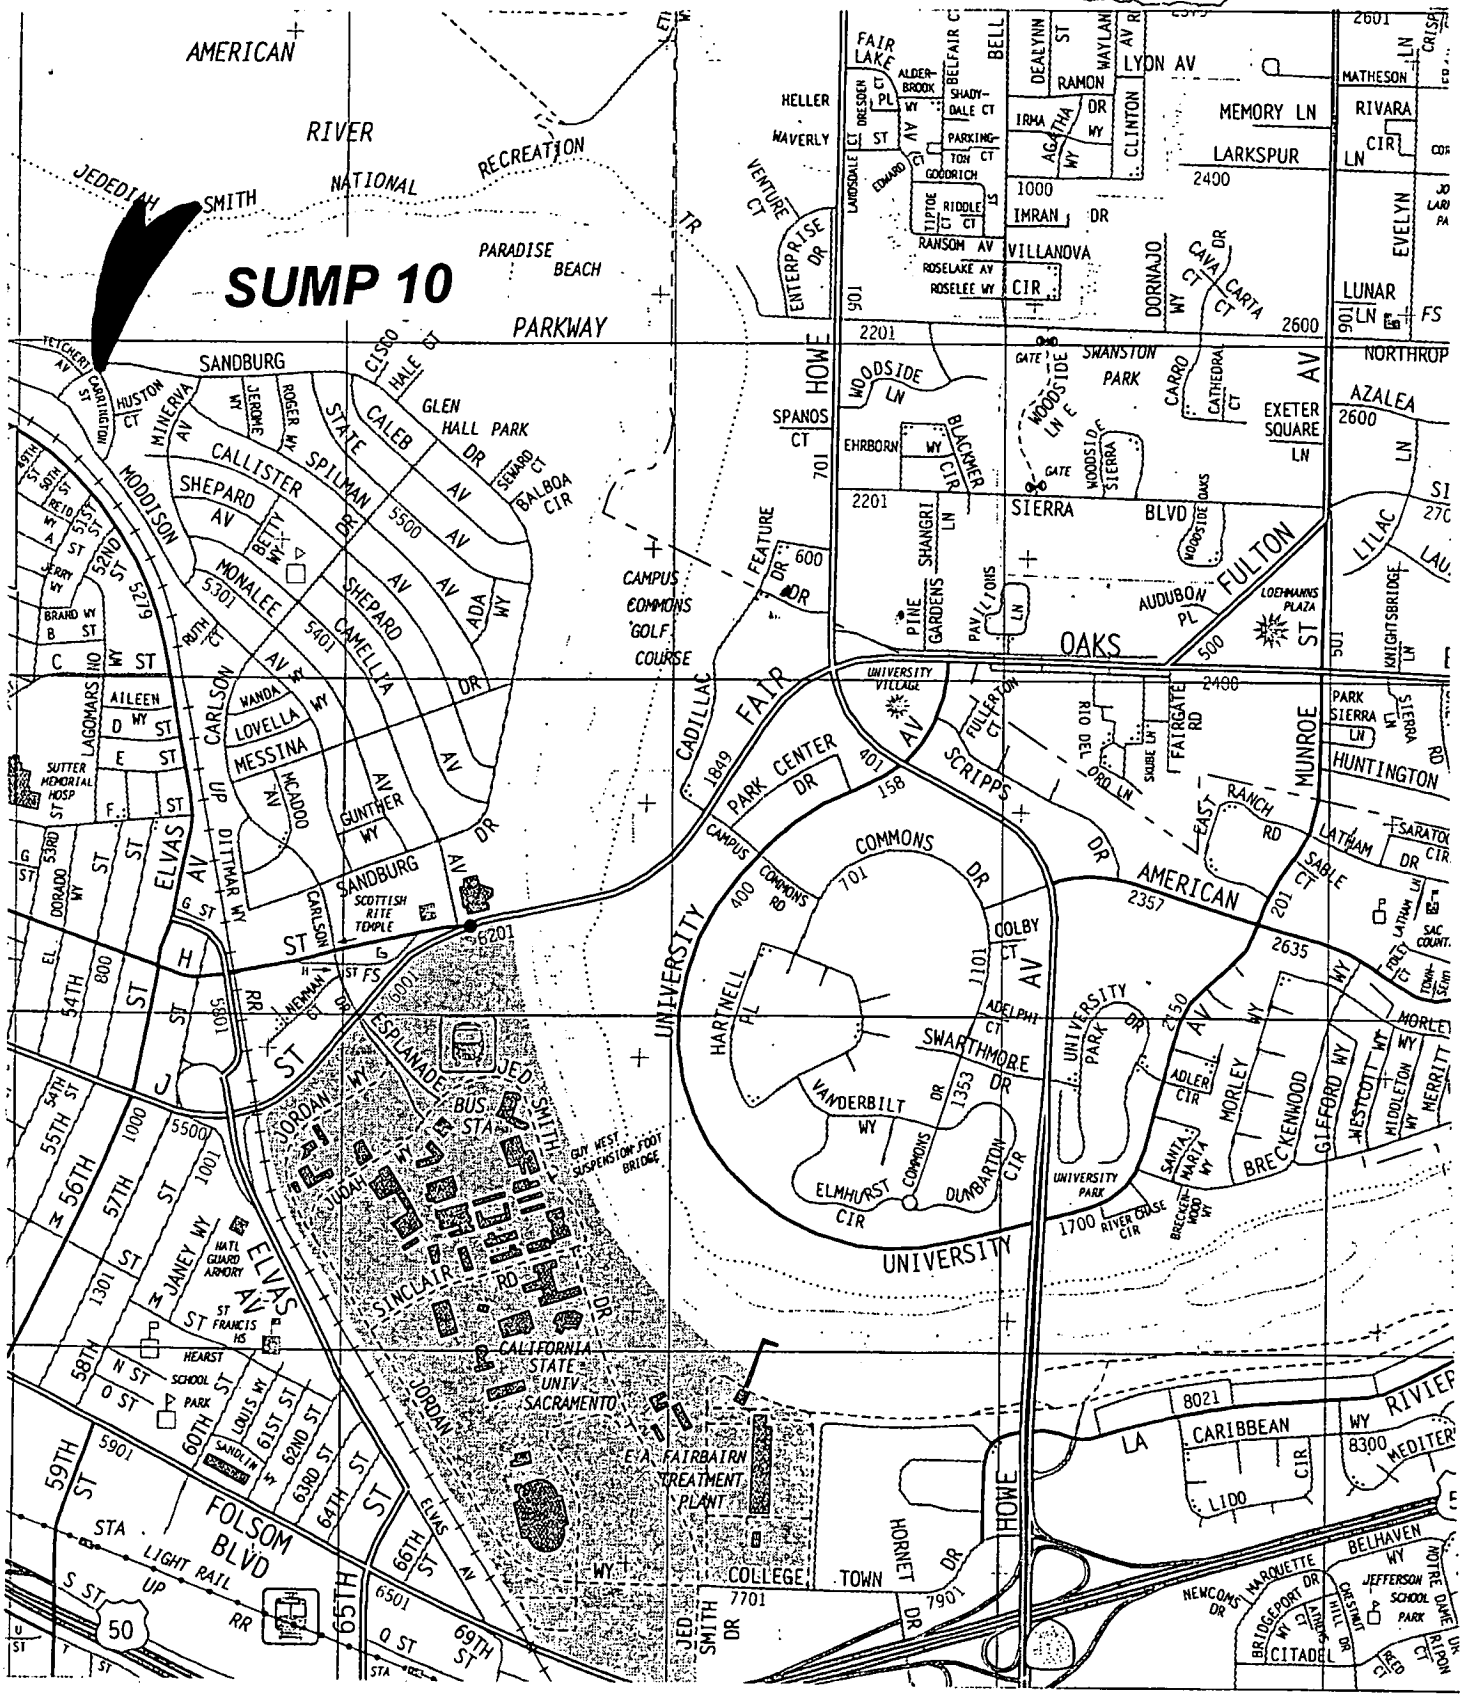

ROBERT P. THOMAS
