

APPLICATION FOR PERMIT TO BUILD

Here 44

Street No. 2404 Tullin Way Lot 4532 Block 5 Section 3

Owner M. P. Patisson Address 2404 Tullin Way

Architect _____ Address _____

Contractor Geo. A. Johnson Address 11015 5th

Kind of Building 2 story brick with

Permit 6102

Date 11/12/23

District 125

Foundation _____

Posts _____ Girder _____ Span _____ Mud Sills _____

	1st Floor	2nd Floor	3rd Floor	4th Floor	5th Floor	6th Floor
Joists						
Max. Span						
Bearing Partitions						
Non Bearing Partitions						
Story Height	<u>7' 6" 1/2</u>					
Outside Walls						

Ceiling Joists _____ Span _____

Roof _____ Rafter _____

Water Heater _____ Chimney _____

Size of Building—Length _____ Width _____ Height _____

It is hereby agreed that this building will be constructed in conformity with the Ordinances of the City of Sacramento and the Laws of the State of California.

ESTIMATED COST, \$ 2000

Plans must be submitted

Geo. A. Johnson
OWNER OR OWNER'S REPRESENTATIVE.

1. The first step in the process of identifying a problem is to recognize that a problem exists. This is often done by comparing current performance with a desired state or goal. For example, a manager might notice that sales are declining or that customer satisfaction is low. Once a problem is identified, the next step is to define it more precisely. This involves determining the scope of the problem, its causes, and its effects. For instance, a manager might define a sales decline as a 10% drop in revenue over the last quarter, caused by a decrease in the number of new customers and a reduction in the average order value. The third step is to analyze the problem. This involves gathering data, identifying patterns, and testing hypotheses. For example, a manager might analyze sales data to see if there is a seasonal trend or if the decline is more pronounced in certain regions. The fourth step is to generate potential solutions. This involves brainstorming ideas and evaluating their feasibility. For instance, a manager might consider increasing marketing efforts, offering discounts, or improving customer service. The fifth step is to implement a solution. This involves developing a plan, allocating resources, and putting the solution into action. For example, a manager might develop a marketing plan that includes a social media campaign and a sales promotion. The final step is to evaluate the results. This involves monitoring the performance of the solution and comparing it to the desired state. For instance, a manager might track sales and customer satisfaction over the next quarter to see if the solution has been effective. If the results are not satisfactory, the manager may need to re-evaluate the problem and try a different solution.
