EE Houch
Owner or Owner's Representative.

1. The first step in the process of identifying a problem is to recognize that a problem exists.

2. The second step is to define the problem in terms of its symptoms and causes.

3. The third step is to identify the goals that need to be achieved to solve the problem.

4. The fourth step is to generate alternative solutions to the problem.

5. The fifth step is to evaluate the alternative solutions and select the best one.

6. The sixth step is to implement the selected solution.

7. The seventh step is to monitor the results of the solution and make adjustments as needed.

8. The eighth step is to evaluate the overall effectiveness of the solution.

9. The ninth step is to document the solution and the process used to solve the problem.

10. The tenth step is to share the solution with others who may be facing a similar problem.

11. The eleventh step is to reflect on the process and learn from the experience.

12. The twelfth step is to apply the lessons learned to future problems.
