City Council
Sacramento, California

Honorable Members in Session:

SUBJECT: Agreement with the American River Flood Control District to Provide Right of Way for a Portion of the Sacramento Northern Bikeway

SUMMARY:

The attached agreement provides for approval by the American River Flood Control District for the City to construct a paved bike trail over district property and for the City to assume liability from the City's installation of the bike trail upon the district's property.

BACKGROUND:

The City has constructed several phases of the Sacramento Northern Bikeway with currently two phases yet to construct. One of the two phases, the section of the bikeway from the American River Parkway to South of El Camino Avenue, requires construction along the American River levee for a distance of approximately 3,000 feet. The American River Flood Control District has the easement for the levee and provides levee maintenance in this area. In past negotiations with the Flood Control District, they have been very reluctant to use their levee tops for bikeways. City staff has met with the staff of the Flood Control District and the Governing Board of the District and has worked out an agreement between the City and the American River Flood Control District that would permit construction of the bike trail with the City indemnifying and holding the district harmless in claims due in whole or in part in the City's installation of the bike trail. The City Attorney's office and City Engineer's office and the Director of General Services have reviewed and approved this agreement.

FINANCIAL:

This agreement has minor financial impact as the only fiscal obligation under this agreement, other than the assumption of liability, is for the City to provide appropriate warning signs to be used by the district during maintenance operations on the levee.
