<p>COMMENTS: Applicant received ER design approval before setbacks and lot coverage were finalized. Applicant calls out 25' min front setback from front porch on plans but when measured to scale the distance is only 20'. There is 19' in the rear leaving 1' short for the rear setback if the house is pushed back 5' to meet min front yard setback. Approx house area 2080'/5227' (metroscan) = 40% total lot coverage okay. Requested that applicant resubmit revised plans with appropriate setbacks called out. Revised plans will need to be rechecked for design, setbacks and lot coverage when applicant resubmits with appropriate setbacks.</p> <p>REVISED: After discussing with Ashley in Design Review and Mike (the applicant) from Olenka Builders, the porch width will be reduced by one foot to meet the minimum required 25' front and 15' rear yard setbacks as called out on the revised plans. Design review requires that the decorative railing be removed in order to increase accessibility of the reduced porch width to 4'. Lot coverage is okay at maximum 40%. Mike authorized the revise plans as we discussed.</p>
