SITE VISIT OBSERVATIONS			
Date	Representative	Time	Mileage
2-25-00	R. Nicholson	2 hours	18 miles
<p><b>SUMMARY OF SITE OBSERVATIONS:</b> Work is ongoing for placement of rebar. Contractor anticipates ready for concrete late AM this date. All footing excavations will need to be free of debris and sluff prior to placement. Contractor advised that several "housekeeping" items will need to be addressed as an ongoing effort. Footing excavations will need to be cleaned of sluff to maintain specified depth. De-watering of some of the excavations is required and was in progress during my observation. Rebar caked of mud, etc. will need to be wire brushed (contractor had several brushes on site). Several mats in the column footings need to be made square and true. Over all, the project is in winter/rain mode, but I see no major problems at this time. Recommend reinspection immediately prior to placement of concrete.</p>
