Re: Demmel House  
1408 Santa Ynez, Sacramento

Dear Sir or Madam:

The following issues were brought to my attention during the shear inspection of the demmel remodel.

1. The wall at the back of the upstairs has been changed. A single 10' shear wall now exists. This wall shall be 3/8" osb or plywood nailed with 8d common wire nails at 4" o.c. edge, 12" o.c. field. In lieu of the MST straps shown on the plans, install 1/2" dia. x 3 1/2" lag screws at 6" o.c. through the sill plate to the beam below. Lag screws shall have 2"x2"x3/16" plate washers.
2. A 4x12 DF No. 2 header is acceptable for the sliding glass door at the back of the upstairs. See attached load/length table.
3. After field inspection of the 2x framing above the bedroom at the front of the house, I have determined that the existing framing is and adequate substitute for the 4x14 with California framing shown on the plans.
4. Beam #1 spans from end wall to end wall. The existing beam is acceptable. See attached calculation.
5. See the required detail for the post support at the TJI joists at the stairs.

Sincerely,

Richard M. Robertson, P.E.

Re: Demmel House Additions, 1408 Santa Ynez Way, Sacramento, CA

The second floor framing at the dormer on the east side may be changed to run from bearing wall to bearing wall in the north-south direction. The joists should be doubled at the front of the dormer.

Sincerely,

  
Dennis Greenbaum
