#### Additional Information

The proposed tenant of the existing warehouse building is a heating and air conditioning company. The applicant proposes to provide 4,885 square foot of office space within the existing building for sales representatives of the company. The office space totals 39 percent of the 12,500 square foot building. The Zoning Ordinance requires a Zoning Administrator Special Permit for office areas under 10,000 square feet that exceed 25 percent of the total square footage of the building within the Industrial zones. The proposed site plan indicates adequate parking and setbacks for the office and warehouse uses. The increase in office space is minimal and the existing infrastructure can accommodate the proposed use.

#### Environmental Determination

This project will not have a significant effect on the environment and is exempt from environmental review pursuant to State EIR Guidelines {California Environmental Quality Act, Section 15301(a)}.

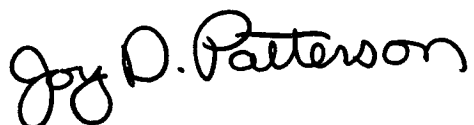

#### Conditions of Approval

1. A minimum of six (6) trees shall be planted in the existing landscape setback areas. The trees shall be a minimum of five (5) gallon in size. The applicant shall provide a planting plan to Zoning Administrator's staff for review and approval prior to issuance of building permits.
2. Size and location of the office space and building shall conform to the plans submitted.
3. If a trash dumpster is utilized by the company it shall be kept inside the existing building or a trash enclosure that meets Zoning Ordinance requirements shall be constructed on the property.

4. The applicant shall obtain all necessary building permits prior to commencing construction.
5. Any addition to or expansion of the existing office space within the building will require Planning review and approval.

Findings of Fact:

1. The proposed project, as conditioned, is based upon sound principles of land use in that the increase in office space percentage is minimal and necessary for the operation of the business and the project will not substantially alter the characteristics of the site or the surrounding area.
2. The project will not be detrimental to the public health, safety, or welfare nor result in a nuisance in that adequate on-site parking and setbacks, and additional landscaping will be provided.
3. The project is consistent with the General Plan which designates the subject site as Heavy Commercial or Warehouse.

Joy D. Patterson  
Zoning Administrator

A use for which a Special Permit is granted must be established within two years after such permit is approved. If such use is not so established the Special Permit shall be deemed to have expired and shall be null and void. A Special Permit use which requires a Building Permit shall be deemed established when such Building Permit is secured and construction thereunder physically commenced. If no building permit is required, the use shall be deemed established when the activity permitted has been commenced.

The decision of the Zoning Administrator may be appealed to the Planning Commission. An appeal must be filed within 10 days of the Zoning Administrator's hearing. If an appeal is not filed, the action of the Zoning Administrator is final.
