Exterior Building Materials: Stucco, wood trim
Roof Material: Fiberglass shingle

PROJECT EVALUATION: Staff has the following comments:

A. Land Use/Zoning

The subject site is zoned Standard Single Family (R-1) and is developed with a single family residence garage and shed. Surrounding land uses are all single family residential.

B. Proposal

The applicant proposes to remove the existing deteriorating shed and garage and construct a two car garage attached to a second residential unit. The proposed second residential unit will be single story.

Elevations submitted show a stucco and wood trim 633 sq. ft. residential unit. The overall design of this unit, including the proposed building materials, are compatible with the main residential unit which is also stucco with wood trim. The proposed fiberglass shingle roof is compatible with the main residence and the surrounding neighborhood.

C. Zoning Ordinance Requirements, Second Residential Unit

The Zoning Ordinance requires a special permit to establish an attached or detached second residential unit. A second residential unit special permit shall not be granted unless:

1. The architecture is compatible with the main residential unit. Staff finds the proposed elevations to be compatible with the main residence.
2. Parking requirements shall be complied with for the additional unit. A new enclosed 720 sq. ft. garage is proposed which will accommodate the required two cars.
3. The height, lot coverage and setback requirements are met. These requirements have been met.
4. The area of the second residential unit will not exceed 640 sq. ft. The proposed unit is 633 sq. ft.
5. The second residential unit will comply with those conditions established by the Planning Commission to mitigate any adverse impact on neighboring residence.

D. Interdepartmental Review

The proposal was reviewed by the Departments of Traffic Engineering, Engineering, Building Inspections and Fire Department. The following comments were received:

Engineering

Do not build over existing easements, if any.

ENVIRONMENTAL DETERMINATION: This project is exempt from environmental review pursuant to State EIR Guidelines CEQA Section 15303 (a)).

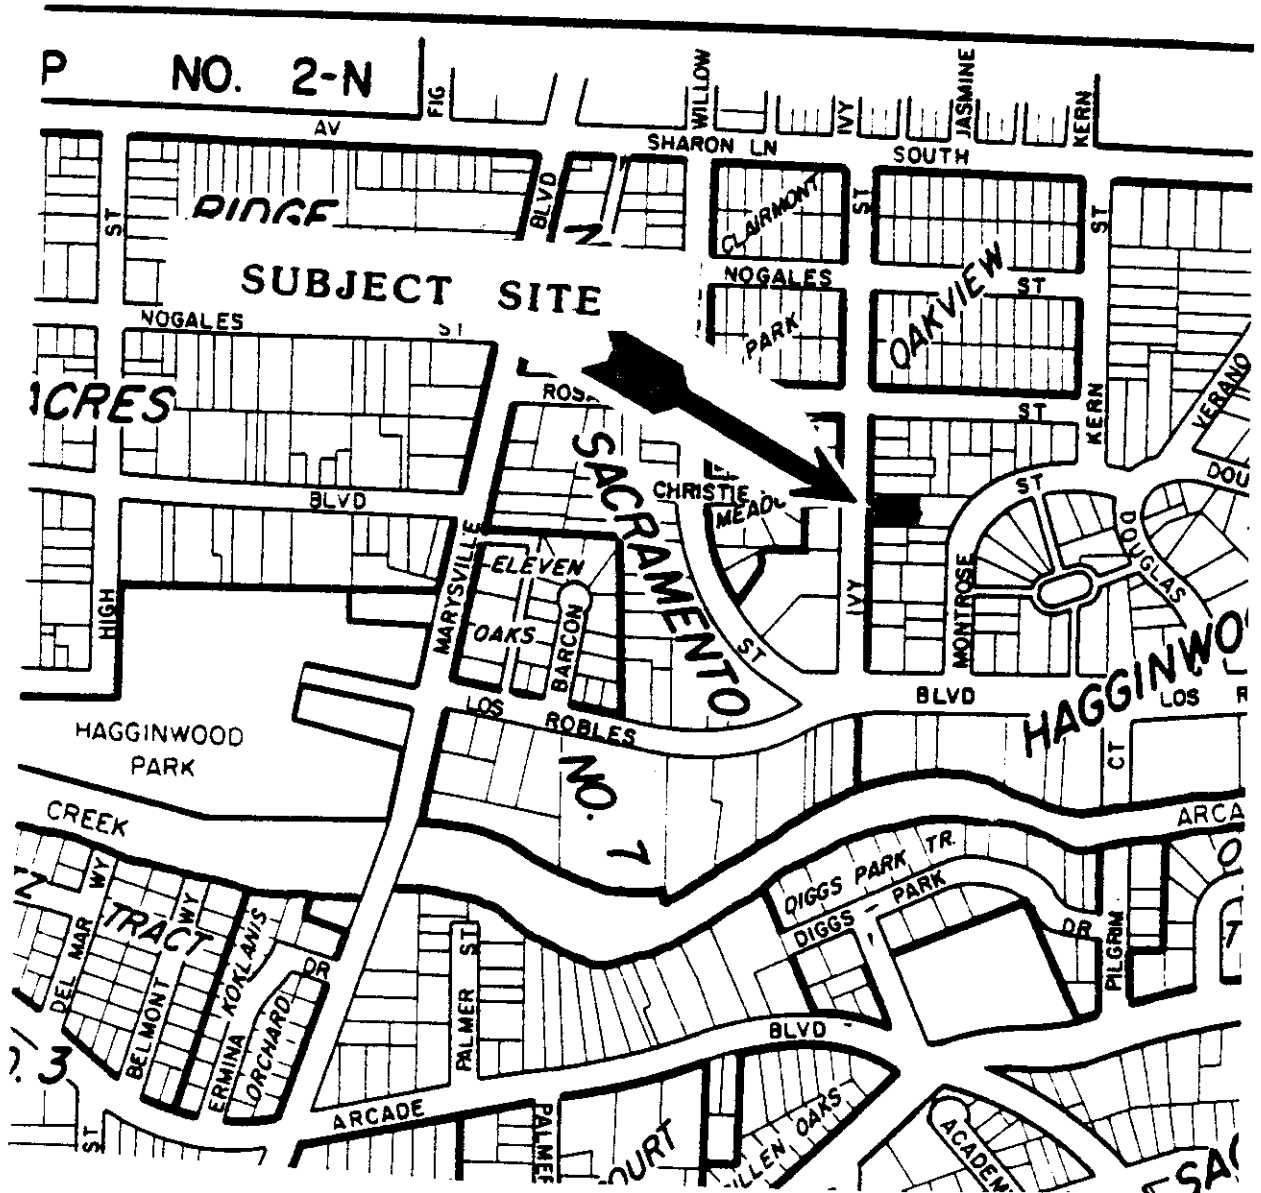

RECOMMENDATION: Staff recommends approval of the special permit subject to conditions and based upon the findings of fact which follow:

Conditions

1. The second residential unit shall not exceed 640 sq. ft.
2. The project shall be constructed as per the submitted plans in this report.

Findings of Fact

1. The special permit, as conditioned, is based upon sound principles of land use in that the project is compatible with surrounding single family residential development.
2. The special permit, as conditioned, will not be detrimental to public health, safety or welfare, nor result in the creation of a nuisance in that (a) adequate parking on site has been provided; and (b) the design of the project is compatible with the existing dwelling and surrounding properties.
3. The proposed project is consistent with the City's Land Use Policy in that the site is designated for residential use by the 1984 North Sacramento Community Plan and the proposed residential use is consistent with the Plan Designation.
