December 9, 1980

City Council  
Sacramento, California

Honorable Members in Session:

SUBJECT: Approval of Plans and Specifications for Water Main  
Installation in 16th Street, 17th Street, H to L Streets

### SUMMARY

The Division of Water and Sewers has prepared plans and specifications for the subject project. Copy of said plans and specifications has been forwarded to the City Clerk and approval is recommended.

### BACKGROUND

The 16" diameter riveted-steel water main located in 16th Street which was installed in the early 1900's is in an deteriorated condition. During the last several years it has been necessary for City maintenance personnel to make an excessive number of repairs to this badly deteriorated main. Because of excessive maintenance cost, this water main should be replaced. 17th Street was the chosen alignment because of the excessive traffic on 16th Street.

### FINANCIAL DATA

This project is included in the 1978-79 Water Distribution Capital Improvement Budget. Estimated construction cost is \$65,000.00. Additional money will be required from the Miscellaneous Water Improvement Fund. When the contract amount is known, a request will be made for transfer of funds.

### RECOMMENDATION

It is recommended that the plans and specifications be approved and that bids be received on January 6, 1981.

Respectfully submitted,

Harry G. Behrens  
Manager

Recommendation approved:

  
Walter J. Slife  
City Manager
