Background Information: Pacific Bell Mobile Services (PBMS), the applicant, has applied for the appropriate entitlements to install a new cellular system throughout the City and County. The City of Sacramento anticipates approximately 18 new applications for various sites throughout the City (a total of 13 of the 18 applications have been filed to date). The proposed system consists of installing Personal Communication Services (PCS) which is a micro-cell system that provides in-building and in-car wireless telecommunication service.

Additional Information: The applicant proposes to locate a 63 foot metal monopole with cellular antenna panels and a 22 square foot equipment shelter to house cellular equipment at the northeast corner of the industrial site. The site has a trucking terminal operation. The monopole will have six panels at the top. Each panel is 4.5 feet tall by nine inches wide by three inches deep. Any cellular equipment (antennas) which both receives and transmits requires a Zoning Administrator's Special Permit according to the Zoning Ordinance.

The site is located within the Richards Boulevard Design Review area. The applicant has filed an application with the Design Review staff (DR 95-251). The project will be reviewed by the Design Review/Preservation staff for aesthetics and design. The project will be conditioned to provide design enhancements such as antenna location and an exterior color scheme in order to aesthetically blend with the surrounding mixed use area.

The project is within the Richards Boulevard PAC and the Richards Boulevard Business Association areas. The proposed plans have been submitted to the neighborhood association. The Richards Boulevard PAC has reviewed the project at their Board meeting and recommended approval. No comments have been received from the Richards Boulevard Business Association.

The project has been noticed and staff has received one call from the adjacent property

owner to the north who is opposed to the monopole. The property owner sent a letter stating his objections relating to aesthetics and health concerns (see Exhibit E).

Environmental Determination: This project, as proposed, will not have a significant impact on the environment and a negative declaration with no mitigation measures has been prepared and filed.

Conditions of Approval

1. The proposed project shall receive Design Review staff approval for actual monopole/antenna location, design, and color scheme prior to issuance of building permits. Size and location of the antennas shall conform to the plans submitted unless the Design Review staff requires panel design/location changes. If changes are required, then the applicant shall submit a revised plan to Planning staff prior to issuance of a building permit. The applicant shall use non-reflective paint on the antenna dishes to prevent glare.
2. Size and location of the equipment cabinets and monopole shall conform to the plans submitted.
3. Any additional panels shall require a modification of the Special Permit. {Six panels are approved}
4. The applicant shall obtain all necessary building permits prior to commencing construction.
5. The Special Permit for the cellular monopole shall have a term limit of twenty years to expire on January 23, 2016. At that time the applicant shall reapply for the continued use of the site for cellular operations.
6. Any parking spaces eliminated by the location of the monopole and equipment shelter will be relocated and striped (meeting paving and stall size requirements) somewhere else on the site.

Findings of Fact:

1. The proposed project, as conditioned, is based upon sound principles of land use in that the monopole with antenna panels will be located on a portion of a heavy industrial site adjacent to railroad right-of-way.
2. The project will not be detrimental to the public health, safety, or welfare nor result in a nuisance in that:
  - a. the proposed cellular equipment and monopole will be located in a corner of a

landlocked industrial site adjacent to an railroad right-of-way; and

- b. the design and location of the monopole with antenna panels will not significantly impact the surrounding industrial area and will be review and approved by the Design Review staff.
3. The project is consistent with the General Plan and the Central City Community Plan which designate the subject site as Special Planning District and Office respectively.

---

Joy D. Patterson  
Zoning Administrator

A use for which a Special Permit is granted must be established within two years after such permit is approved. If such use is not so established the Special Permit shall be deemed to have expired and shall be null and void. A Special Permit use which requires a Building Permit shall be deemed established when such Building Permit is secured and construction thereunder physically commenced. If no building permit is required, the use shall be deemed established when the activity permitted has been commenced.

The decision of the Zoning Administrator may be appealed to the Planning Commission. An appeal must be filed within 10 days of the Zoning Administrator's hearing. If an appeal is not filed, the action of the Zoning Administrator is final.

Re: Proposed Project AZ95-105, 325 North 5th Street  
63 Foot High Monopole for Wireless Telecommunication

Dear Ms. Yope:

My wife and I are the owners of a property at 500 Richards Boulevard, directly adjacent to the subject property where the cellular transmission pole is proposed. In fact, it appears to us that the proposed monopole will be located only ten feet from our property line.

We were first notified of this proposal in mid-November, 1995. The "Mail Notification Form" was dated 9/13/95, but it had not been postmarked until 11/15/95. Our office manager, Holly Jaffe, called and expressed our concern about the project to Mr. Randy Lum of your department. He assured us that the project had already been denied by the Zoning Administration, and that the permit for use had been denied.

Unfortunately, it appears that Mr. Lum was in error and had confused this site with another. We received the Notice of Public Hearing on January 2, 1996. Our office manager talked to you on January 4, and you suggested to her that we write a letter expressing our concerns, as we will probably not be able to come up to Sacramento for the hearing.

WE ARE OPPOSED TO THE PROPOSED PROJECT. WE FEEL IT WILL NOT BENEFIT US IN ANY WAY, AND WILL BE DETRIMENTAL TO OUR BEING ABLE TO LEASE OUR PROPERTY. ASIDE FROM BEING A TOWERING EYESORE JUST OVER THE PROPERTY LINE, MANY PEOPLE HAVE CONCERNS ABOUT CELL SITE EMISSIONS. THEIR POSSIBLE NEGATIVE EFFECTS FOR PEOPLE WHO LIVE AND WORK IN CLOSE PROXIMITY HAVE NOT BEEN ADEQUATELY STUDIED ENOUGH TO BE COMPLETELY DISMISSED.

WE UNDERSTAND THAT YOU CONSIDER THIS A GOOD LOCATION, TUCKED BACK FROM THE STREET, ETC. WE WOULD LIKE THIS PROPOSAL TO BE DENIED. IF THE ZONING ADMINISTRATOR DOES NOT DENY THIS PROPOSAL, PERHAPS THE LOCATION COULD BE ADJUSTED SO THAT IT WAS FURTHER FROM OUR PROPERTY LINE. WE WOULD APPRECIATE YOUR CONSIDERATION OF OUR REQUEST.

Yours very truly,
