Previous File Numbers: P88-395

Background Information: On February 7, 1989, the City Council approved numerous entitlements including a Rezone and a Tentative Map to create the smaller parcels of the project area in order to convert existing duplex units to halfplex units and construct new halfplex units. (P88-395). On December 15, 1988, the Planning Commission took action on the same project.

Additional Information: The applicant proposes to merge the common property line between two sets of two parcels in order to create two larger parcels in order to build two single family residences. The existing four parcels are very narrow and the parcel merger will create two parcels that are wider (58' x 100') and provide the minimum lot size for an interior residential parcel. The merger of these four lots into two lots will not affect the overall density range of the area (7-15 du/na).

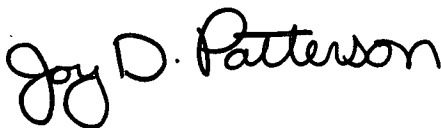

The lots are located in the Strawberry Manor Design Review District. The proposed residences will require review and approval by City Design Review Board staff.

Agency Comments

The proposed project has been reviewed by the City Transportation Division, Utilities Division, and Engineering Development Services. The comments received have been included as conditions in the attached resolution.

Environmental Determination

This project will not have a significant effect on the environment and is exempt from environmental review pursuant to State EIR Guidelines {California Environmental Quality Act, Section 15305(a)}.
