DEPARTMENT OF PLANNING & DEVELOPMENT
ZONING ADMINISTRATOR
1231 I Street, Sacramento, CA 95814**

ACTION OF THE ZONING ADMINISTRATOR

On Thursday, December 19, 2002, the Zoning Administrator approved with conditions a special permit to establish an off-site parking lot to provide required parking for additional residential units for the project known as file Z02-187. Findings of Fact and conditions of approval for the project are listed on page 3.

Project Information

Request: Zoning Administrator Special Permit to construct a 2,626 square foot duplex on an interior lot on 0.07± undeveloped acres in the Single Family or Two Family (R-1-B) zone.

Location: 2526 V Street (D4, Area 1)

Assessor's Parcel Number: 010-0173-009

Applicant: Bruce Whitelam
2120 20th Street
Sacramento, CA 95818

Property Owner: GAW Construction
2120 20th Street
Sacramento, CA 95818

Project Planner: Lindsey Alagozian

General Plan Designation: Low Density Residential 4-15 du/na
Central City

Community Plan Designation: Low Density Residential

Existing Land Use of Site: Vacant

Existing Zoning of Site: Single Family or Two Family (R-1B) zone

Surrounding Land Use and Zoning:

North: R-1B; Residential

South: R-1B; Residential

East: R-1B; Residential

West: R-1B; Residential

Project Plans: Exhibit A, B, and C

Previous Files: None

Additional Information The applicant is proposing to construct a 2,626 square foot duplex on an interior, vacant lot. Unit 1 is approximately 1,186 square feet and Unit 2 is approximately 1,213 square feet in size. Each unit will contain 2 bedrooms, a living room, dining room, kitchen, and two bathrooms. A one-car garage will be provided, although the site does not require off-site parking because it is 3,200 square feet in size. An additional parking pad will be provided along the eastern side of the duplex. The total lot coverage for the site will be 48% in which 60% is the allowed maximum coverage. According to the Zoning Ordinance, duplexes on interior lots in the R-1B zone require approval of a Special Permit by the Zoning Administrator.

The project is located within the Newton Booth Neighborhood Association. Project plans were sent to the association for review and comments. In addition, staff posted the site and noticed property owners within 100 feet of the subject site. Staff received no comments or concerns regarding the project.

Agency Comments

The proposed project has been reviewed by the City Utilities Department, the Building Division, and the Fire Department. The comments received pertaining to the duplex have been included as conditions.

Environmental Determination

This project will not have a significant effect on the environment and is exempt from environmental review pursuant to California Environmental Quality Act Guidelines, Section 15303(b) New Construction or Conversion of Small Structures.

Conditions of Approval:

1. The duplex shall be constructed per submitted plans. Any modification shall require Planning review and approval.
2. The applicant shall comply with Design Review conditions of approval.
3. No mechanical equipment shall be placed on the roof. Any necessary vents shall be painted to match the roof color.
4. The applicant shall provide landscaping and automatic irrigation in the front yard.
5. The applicant shall obtain the necessary building permits prior to commencing construction.
6. An address for the second unit shall be provided at the front of the property such that it is visible to the street.

Utilities

7. The proposed project is located in the 100-year floodplain, designated as an A99 zone on the Federal Emergency Management Agency (FEMA) Federal Insurance Rate Maps (FIRMs) that have been revised by a Letter of Map Revision effective May 22, 2000. Within the A99 zone, there are no requirements to elevate or flood proof.
8. This project is served by the Combined Sewer System (CSS). However, based on the information found in the special permit application, we do not anticipate any significant impacts to the CSS. Consequently no Impact/Mitigation Agreement is required.

Findings of Fact

1. Granting the Special Permit is based upon sound principles of land use in that:
 - a. the duplex will be constructed in accordance with all city codes; and
 - b. the duplex will not significantly impact or alter the site or surrounding residential and uses.
2. Granting the Special Permit would not be detrimental to the public welfare nor result in the creation of a public nuisance in that:
 - a. the duplex will be architecturally consistent with the surrounding residential neighborhood; and
 - b. the project is consistent with the city's policies to encourage infill development on vacant parcels; and
3. The project is consistent with the General Plan and the Central City Community Plan which designate the site as Low Density Residential 4-15 du/na and Low Density Residential, respectively.

 Joy D. Patterson
 Zoning Administrator

A use for which a Special Permit is granted must be established within two years after such permit is approved. If such use is not so established the Special Permit shall be deemed to have expired and shall be null and void. A Special Permit use which requires a Building Permit shall be deemed established when such Building Permit is secured and construction thereunder physically commenced. If no building permit is required the use shall be deemed established when the activity permitted has been commenced.

The decision of the Zoning Administrator may be appealed to the Planning Commission. An appeal must be filed within 10 days of the Zoning Administrator's hearing. If an appeal is not filed, the action of the Zoning Administrator is final.
