Special Inspection Final Report
ARENA CORPORATE CENTER - BUILDING B
 Permit No. 0205962
 WKA No. 3918.07

In accordance with City of Sacramento special inspection requirements, our firm has performed *Special Inspection and Testing* in accordance with Sections 106 and 1701 of the Uniform Building Code for the subject project. Our observation and test results indicate that the following items were constructed, to the best of our knowledge, in accordance with the project's plans and specifications:

Structural

Steel: Performed shop welding inspection of tube steel columns at Sierra Metal Fabrication, Sacramento, California. Monitored contractor compliance with Welding Procedure Specifications (WPS). Identified material with manufacturer's mill certificates. Checked welder certification records. (Columns were fabricated at the same time as those for Buildings A and C).

Note: Our firm did not sample or test concrete at this building. We understand the design strength for concrete for this building is 2500 psi. We understand the 1997 UBC does not require special inspection and testing of foundation and non-structural slab concrete with design strength of 2500 psi or less (Section 1705.5.1).
