Sacramento, California

Honorable Members In Session:

SUBJECT: Ordinance Adding Section 12.72 to Article IV, Chapter 12, of the City
Code Relating to Revocable Permits - Pass for Publication of Title

SUMMARY

The proposed addition to the City Code will authorize the Director of Public Works to review applications for and approve or conditionally approve Revocable Permits for routine non-controversial uses behind existing curbs and gutters. It is recommended that the Committee approve the attached proposed ordinance and forward it to the City Council for publication of title.

BACKGROUND

Chapter 12, Article IV, of the City Code sets forth regulations for the issuing of Revocable Permits by the City Council for various uses of public property. Many of these requests are routine and non-controversial in nature and involve use of City property behind existing curbs and gutters for the construction of planters or other items of a similar nature. They are usually approved by the City Council as consent items. Two or three revocable permits appear on the Council agenda each week.

Adoption of the proposed ordinance will help to streamline the process for approving these routine permits. It will save staff time, reduce permit issuance time by three weeks, and eliminate some routine items on the Council agenda. Significant or potentially controversial permits will continue to be submitted for Council approval.

The proposed ordinance is one step in the process of updating the revocable permit process. Staff will continue to examine if the process and its requirements can be simplified further.

Ordinance Adding Section 12.72 to Article IV,
Chapter 12 of the City Code
November 10, 1987
Page 2

The proposed addition to the City Code will authorize the Director of Public Works or his designee the authority to execute these permits and eliminate the need for Council action on these minor uses of City right-of-way. This proposed ordinance has been reviewed and approved in concept by the City Attorney's office.

FINANCIAL

Up to 60 Revocable Permits per year have been issued through the City Council. It is expected that approximately one-fourth to one-half of these permits would be approved by the Department of Public Works and would not require Council approval. Adoption of this ordinance will result in a significant savings of staff time and a reduction in the time required to approve a permit.

RECOMMENDATION

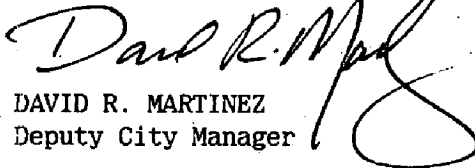

It is recommended that the Committee approve the attached Ordinance and forward it to the City Council for approval of publication of title.

Respectfully submitted,

THOMAS M. FINLEY
Engineering Division Manager

Recommendation Approved:

DAVID R. MARTINEZ
Deputy City Manager

Approved:

MELVIN H. JOHNSON
Director of Public Works
