

RESOLUTION No. 153

Adopted by The Sacramento City Council on date of

April 4th, 1929

WHEREAS, California cities, towns and sanitary districts are being faced with problems of disposing of their sewage and industrial waste under peculiar seasonal and climatic conditions which complicate the problems or make them unique, thus rendering inapplicable or of doubtful value methods and standards developed elsewhere; and

WHEREAS, these pressing problems are of vital concern to all communities, large and small, and their separate investigations would involve, in some cases, prohibitive expense and in many cases wasteful duplication of money and effort; and

WHEREAS, the State is the logical agency to undertake the solution of common problems, particularly those affecting the health of its citizens;

NOW, THEREFORE BE IT RESOLVED that the City Council of the City of Sacramento hereby endorse and approve Senate Bill No. 652 providing for sewage research in the State of California;

RESOLVED, FURTHER, that the members of the legislature from the district in which this city is situated, are hereby requested to lend special effort to the furtherance of the purposes herein expressed and the adoption of said Senate Bill No. 652.

Adopted by the City Council on date April 4 1929 by following vote:
 AYES: Anderson, Bidwell, Campbell, Heming, Hateley, Maddox, Monk, Welsh.

CITY CLERK

MAYOR
