December 2<sup>nd</sup>, 1999

To: Juan Travino & "Dangerous Buildings" department,

Greetings on this December day! I am writing you this day to enlighten you on the plans my wife and I have to further renovate our house on 5210 22<sup>nd</sup> Avenue – which is listed with your department.

At this time we are requesting a building permit for the following:

- Level the floor in the upstairs sunroom
- Open the 36" doorway from stair landing leading into sunroom to a 6' opening for double doors (French doors)
- Installing new balusters and railings to the stairway and landing
- Install dual pane windows into the sunroom
- Raise hot water heater and re-plumb gas lines to connect

The plans for the sunroom include the following: Install new vinyl dual pane windows into the three openings (pre-existing); level the floor, which has a sloping pitch from the door opening to the southern wall, with 2 x 4 framing and ¾" plywood. This will cause a 4" rise at the south end of sunroom, thus changing the floor-to-ceiling height to 7' at it's most southern - and lowest point (It is important to note that the ceiling is a sloping ceiling and at approximately 18" from the southern wall the 7'6" height is met); new wiring and outlets are already in place running every six feet; new insulation, Certainteed R-13, will be installed; new drywall will be installed over the frame, insulation, and wiring.

The new door opening will span six feet to accommodate new French doors to the sunroom. The old 36" doorway was found to have dry rot and fungus. The new span will be fortified with a 4" x 6" header. A set of 2 x 4 's will support the header on either side of the opening; a licensed contractor will professionally install it.

The stairs will be equipped with a wooden rail leading up the stairway. At the top of the landing the rail will tie into a wooden baluster on the west side. That same baluster will tie into a six foot stretch of wooden rails which will span back to the rear wall. On the east side of the stairway, on the landing, another baluster and rails will stretch four feet to the rear wall. Thus, the landing will be secured and safe, with proper height, and width of rails, to code requirements.

Any further inquiries can be obtained by reaching me at my residence, at (916) 455-0862.

Thank you,

David Allen
