Honorable Members in Session:

SUBJECT: Resolution Approving Negative Declaration for Woodbine  
Assessment District No. 2

SUMMARY:

The Environmental Coordinator has reviewed the subject project and finds that it will not have a significant adverse effect on the physical environment and therefore recommends that the project and a Negative Declaration be approved by the City Council.

BACKGROUND:

In accordance with State EIR Guidelines for Implementation of the California Environmental Quality Act of 1970, dated December 1976, an Initial Study was performed. As a result of this study, it was determined that the Woodbine Assessment District No. 2 project would not have a significant adverse effect on the physical environment and a draft Negative Declaration was prepared. On May 18, 1981 the Negative Declaration was filed with the County. On May 21, 1981 Notice of Opportunity for Public Review of the draft Negative Declaration was published in The Sacramento Union. The appropriate length of time has elapsed for receipt of comments regarding the Negative Declaration, with no comments having been received.

RECOMMENDATION:

The Environmental Coordinator recommends that the attached resolution be passed which will:

1. Determine that the proposed project will not have a significant effect on the environment.
2. Approve the Negative Declaration.

**APPROVED**  
BY THE CITY COUNCIL

a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	—	—	X
b. Does the project have the potential to achieve short-term, to the disadvantage of long-term, environmental goals? (A short-term impact on the environment is one which occurs in a relatively brief, definitive period of time while long-term impacts will endure well into the future.)	—	—	X
c. Does the project have impacts which are individually limited, but cumulatively considerable? (A project may impact on two or more separate resources where the impact on each resource is relatively small, but where the effect of the total of those impacts on the environment is significant.)	—	—	X
d. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	—	—	X

- 1.b. The installation of curbs, gutters and sidewalks will result in some overcovering of the soil. The overcovering will be located in the street side areas currently used for drainage ditches.
- 2.a. During the construction of the project, there may be some deterioration of the ambient air quality.
- 3.b. The project will provide better capability to handle the rates and amounts of surface water runoff.
- 6.a. During construction of the project, there will be an increase in the existing noise level, caused by the equipment required for the construction.
- 14.e. & f. The project will result in future maintenance of the streets, curbs and gutters and minor maintenance for the sewer and drainage systems. However, the additional effort required is considered to be insignificant with respect to the total requirements for the City.

IV. Mitigation measures proposed to minimize environmental impacts for the project as identified above.  
(Explain in detail - if none, so state)

- 1.b. None
- 2.a. The dust and dirt problem will be controlled by the normal dust management practice of dampening the work site.
- 3.b. None
- 6.a. None
- 14.e. & f. None

- V. Alternatives to the project which would produce less of an adverse impact on the environment.  
(lower density, less intense land use, move building on site, no project, et cetera)

No project - The area would remain in the current condition without  
proper drainage of surface water, inadequate safety  
protection afforded by curbs, gutters and sidewalks,  
and marginal water and sewer service for the residences.

VI. DETERMINATION

On the basis of this initial study:

- I find the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described in IV above have been added to the project or the possibility of a significant effect on the environment is so remote as to be insignificant.
- I find the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT IS REQUIRED.
