Size of Building—Length			Width		Height	

It is hereby agreed that this building will be constructed in conformity with the Ordinances of the City of Sacramento and the Laws of the State of California.

ESTIMATED COST. \$.....

Joseph L. Lopez
OWNER OR OWNER'S REPRESENTATIVE.

Plans must be submitted

1. The first step in the process of identifying a problem is to recognize that a problem exists. This is often done by comparing current performance to a desired state or goal.

2. Once a problem is identified, the next step is to define the problem more precisely. This involves identifying the causes of the problem and the scope of the problem.

3. The third step is to generate potential solutions. This is often done by brainstorming or using a structured problem-solving process.

4. The fourth step is to evaluate the potential solutions. This involves comparing the solutions to the problem and to each other.

5. The fifth step is to select a solution. This is often done by choosing the solution that is most likely to be successful.

6. The sixth step is to implement the solution. This involves putting the solution into action.

7. The seventh step is to evaluate the results. This involves comparing the results to the desired state or goal.

8. The eighth step is to adjust the solution if necessary. This involves making changes to the solution if it is not working.

9. The ninth step is to monitor the solution. This involves keeping track of the results of the solution over time.

10. The tenth step is to document the solution. This involves recording the steps taken to solve the problem.

11. The eleventh step is to share the solution. This involves communicating the solution to others who may be facing the same problem.

12. The twelfth step is to learn from the solution. This involves reflecting on the experience and identifying lessons learned.

13. The thirteenth step is to apply the solution. This involves using the solution to solve other problems.

14. The fourteenth step is to evaluate the application. This involves comparing the results of the application to the desired state or goal.

15. The fifteenth step is to adjust the application if necessary. This involves making changes to the application if it is not working.

16. The sixteenth step is to monitor the application. This involves keeping track of the results of the application over time.

17. The seventeenth step is to document the application. This involves recording the steps taken to apply the solution.

18. The eighteenth step is to share the application. This involves communicating the application to others who may be facing the same problem.

19. The nineteenth step is to learn from the application. This involves reflecting on the experience and identifying lessons learned.

20. The twentieth step is to apply the application. This involves using the application to solve other problems.

21. The twenty-first step is to evaluate the application. This involves comparing the results of the application to the desired state or goal.

22. The twenty-second step is to adjust the application if necessary. This involves making changes to the application if it is not working.

23. The twenty-third step is to monitor the application. This involves keeping track of the results of the application over time.

24. The twenty-fourth step is to document the application. This involves recording the steps taken to apply the solution.

25. The twenty-fifth step is to share the application. This involves communicating the application to others who may be facing the same problem.

26. The twenty-sixth step is to learn from the application. This involves reflecting on the experience and identifying lessons learned.

27. The twenty-seventh step is to apply the application. This involves using the application to solve other problems.

28. The twenty-eighth step is to evaluate the application. This involves comparing the results of the application to the desired state or goal.

29. The twenty-ninth step is to adjust the application if necessary. This involves making changes to the application if it is not working.

30. The thirtieth step is to monitor the application. This involves keeping track of the results of the application over time.
