CA 94010

Job Phone: 888-962-2225 Office Ph. _____ Fee _____

SUBJECT: Project Address: 1689 ARDEN WAY SUITES #1280 Suite # _____
1281

I request permission to start the following work rough plbg, mech'l,
elec, & framing. DO NOT COVER.
Demo non bearing walls

I realize that all work will be at the owner's and contractor's risk without assurance that the permit for the project will be granted. Any code conflicts will be corrected. I agree not to cover or conceal any work or portion thereof. I realize that inspections will not be made on this project until a building permit is issued. All changes required to conform to the approved plans will be completed without dispute. Work affecting the structural integrity of the existing building is not permitted.

I will expedite necessary revisions, corrections and clarifications as required to obtain the building permit.

If it should be determined subsequently by the City that changes in the design of the building are necessary after commencement of the work authorized, I assume full responsibility and all risk of loss which may result by reason of such changes. I agree that the building shall conform to the approved final plans as amended, without regard to the stage of completion.

This authorization is valid for 30 days while the plans are being processed for permit. These state required declarations must be properly executed before this authorization is valid. This authorization is valid when initiated by authorized Building Department personnel and stamped approved. Keep posted on job site at all times.

Description and Remarks:

Please be advised that per our phone conversation the following clouded change below was made to the General Notes. f'c is now 2500 psi instead of 3000 psi. If you have any questions please call me.

CONCRETE WORK

Reinforcing bars shall conform to ASTM A615 Grade 60. Bars shall be secured in place so as to maintain their exact position before and during the placement of concrete.

Clearances and specifications must be as shown on drawings unless noted otherwise.

Formed surfaces in contact with concrete shall be smooth and free of protrusions.

Concrete shall be ready mixed conforming to ASTM C94. All hardware (i.e. rebar) used in suspended slabs and girders on grade shall be designed for the shrinkage (L.S.) using Granite Rock, Kaiser Limestone, or Kaiser Gypsum aggregates with Redun sand or equal. Aggregates with equivalent shrinkage characteristics can be submitted to the Architect for review. Slump shall be the minimum consistent with proper placing. Concrete shall have the following characteristics:

Concrete Characteristics	28 Days	Min. Slump	Min. Cement Content	Max. Water/Cement Ratio
Strength	2500psi	3-1/2"	5 Sacks	0.60

Rapid Set® Cement

TECHNICAL DATA

DESCRIPTION:	RAPID SET® CEMENT is a unique dry hydraulic cement. NO CHLORIDES ARE ADDED. When used as a replacement for Portland Cement, and mixed with water and suitable aggregates, it produces a quality concrete which attains 2000+ psi compressive strength in one hour and is ready for use.
APPLICATIONS:	As a Portland Cement replacement, RAPID SET® CEMENT is ideal for applications where quick concrete strength is required, including repairs of highways, curbs, sidewalks, and floors.
AVAILABILITY:	Through distributors in 50 lb. and 99 lb. polyethylene lined bags. Also available in some locations in bulk.
FEATURES AND BENEFITS:	<p>RAPID SET® CEMENT sets and gains strength rapidly. Almost zero shrinkage results, even when placed at high slump.</p> <p>Additives available for use include RAPID SET® SET CONTROLLER and RAPID SET® ACCELERATOR. These are used to delay the set and to accelerate the set.</p> <p>As a binder for very low strength concrete, RAPID SET® CEMENT is used at about 100 lbs./yd. with sand and water. The resulting mix is typically poured in a utility cut area. The slurry is firm enough to walk on in an hour. Contact RAPID SET® for details.</p>
DIRECTIONS FOR CONCRETE REPAIR:	Remove all unsound concrete, leaving edges and corners square. Adjacent concrete should be free of oil, grease, laitance and debris. Dampen area with water. Mix RAPID SET® CEMENT with sand, aggregates, water and, if desired, an air entraining agent for freeze/thaw protection.
DURABILITY:	<p>With 6% air entrainment, RAPID SET® CONCRETE withstands 1000 cycles of freeze/thaw when tested in accordance with ASTM C 666.</p> <p>A slump of about six inches is used for ease of placement and to assure a good bond. The working time for RAPID SET® CEMENT concrete is about 20 minutes at 70 degrees F (longer at lower temperatures, shorter at higher temperatures).</p>

(Over)

Cement • Concrete Mix • Mortar Mix • Non-Shrink Grout

**DURABILITY
(CONTINUED)**

It is important that the placement operation be organized within this time limitation. After setting, the concrete will gain strength quickly, and finishing operations may be difficult. The working time may be extended by using cold materials and/or **RAPID SET® SET CONTROL®** in cold weather, warm materials and/or **RAPID SET® ACCELERATOR®** may be used to hasten the set and strength development.

CAUTION:

RAPID SET® CEMENT contains cementitious materials. Freshly mixed materials may cause skin irritation. Avoid direct contact where possible and wash exposed skin areas promptly with water. If any cementitious material gets into the eyes, rinse immediately and repeatedly with water and get prompt medical attention. **SEE MSDS SHEET.**

WARRANTY:

RAPID SET® PRODUCTS COMPANY warrants its materials to be of good quality and, at its option, within one year from date of sale it will replace material proven defective or refund purchase price thereof, and such replacement or refund shall be the limit of **RAPID SET® PRODUCTS COMPANY'S** responsibility. Except for the foregoing, all warranties, expressed or implied, including merchantability and fitness for a particular purpose, are excluded. **RAPID SET® PRODUCTS COMPANY** shall not be liable for any consequential, incidental or special damages arising directly or indirectly from the use of its materials.
