Re: Single or Double Girder Truss – 3052: North Pointe Subdivision
O'Connor Freeman Job Number: E001001

Brian:

You recently contacted our office concerning the building inspectors confusion about (2) details on plan 3052 of the Northpointe @ Natomas project. Specifically, you informed our office that details 4/S2.3 and 1/S2.3 show a double girder truss but the truss manufacturer only supplied a single girder truss. The building inspector did not understand why the detail and the truss layout did not coordinate and wanted our office to review this situation. We have reviewed this situation and have determined that there is **NO PROBLEM WITH THE CURRENT FRAMING**. The double girder truss shown on both the details and the structural roof layout are for aesthetic purposes only and do not necessarily represent a true double truss. The reason our office does this is to distinguish a girder truss from a common truss. Therefore, no change shall be necessary to the plans or current framing.

If you should have any further questions or comments please do not hesitate to call.

Sincerely,

O'Connor Freeman & Associates, Inc.

Re: Collector Nailing of Entry - Plan 3052: North Pointe Subdivision
 O'Connor Freeman Job Number: E001001

Brian:

You contacted our office concerning the collector nailing over the entryway on plan 3052 of the Northpointe @ Natomas project. Specifically, because there is a lower and upper roof at the entryway you wanted to know how the collector nailing should be framed. We have reviewed this situation and have determined that the collector nailing should be extended across the lower, main house roof diaphragm and the upper entry roof will not need to be framed with a collector. Please see the attached exhibit 'A' for reference to the mentioned location.

If you should have any further questions or comments please do not hesitate to call.

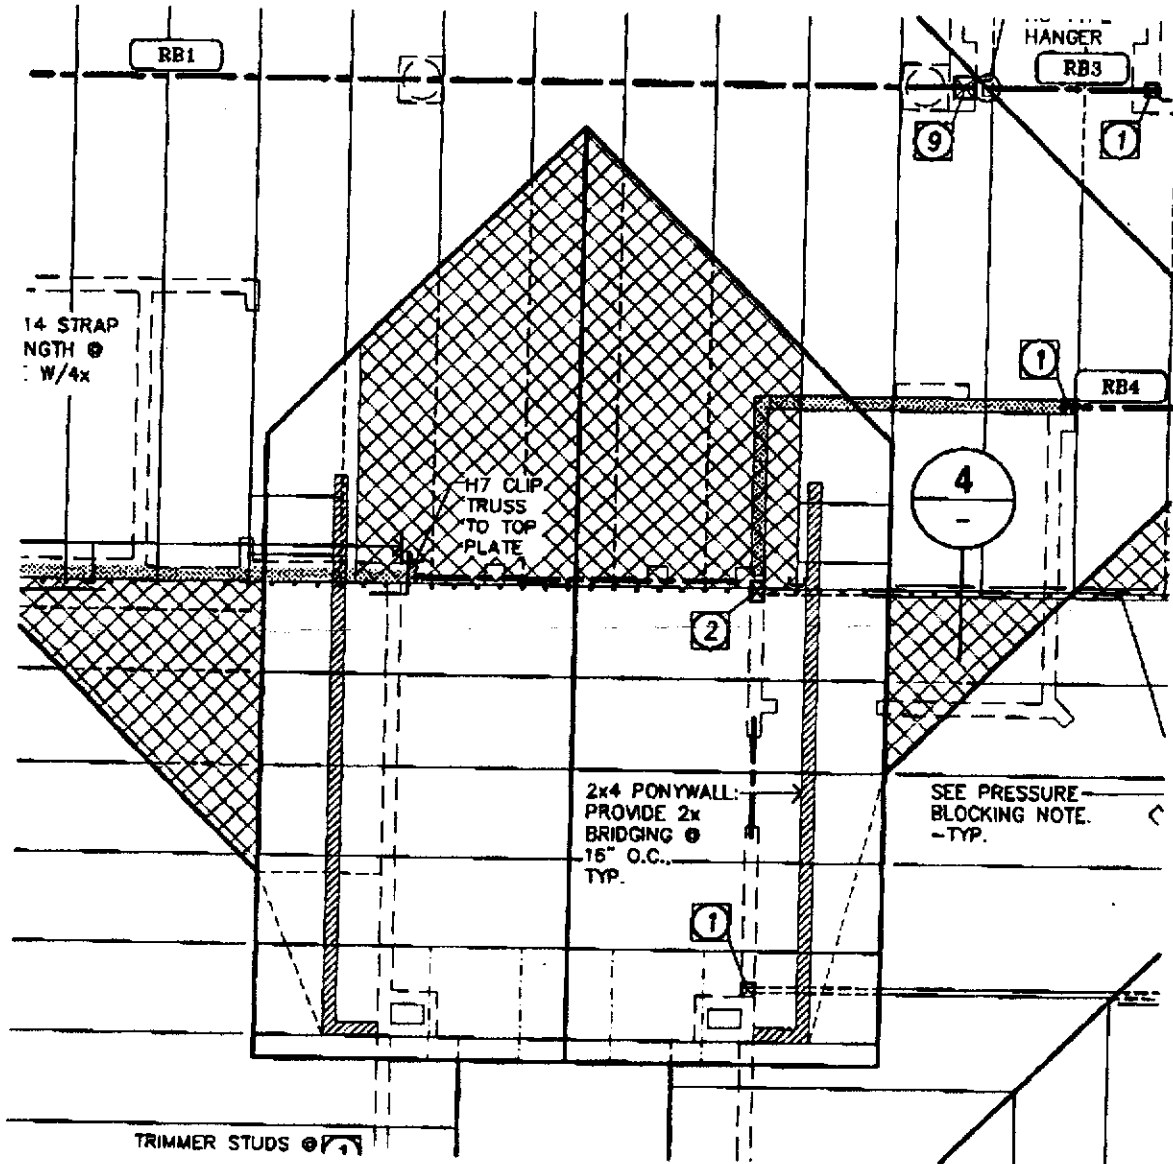

Sincerely,
