Honorable Members In Session:

SUBJECT: Traffic Signals at Main Avenue and Kelton Way (PN:SD66) -  
Funds Appropriation - \$80,000

SUMMARY

Plans and specifications have been prepared for this project. Additional funds are needed for the project and approval of the appropriation of funds is recommended.

BACKGROUND

This project will install traffic signals at the intersection of Main Avenue and Kelton Way. Also provided will be a loop vehicle detection system, left turn phasing, pedestrian walk lights, intersection street lighting, handicap ramps and a raised median island on the east leg of Main Avenue.

A Categorical Exemption for the project was filed with the County Clerk of the County of Sacramento on May 25, 1989. The engineer's estimated construction cost is \$140,500.

FINANCIAL DATA

Additional funds are needed for this project. The estimated total project cost, including all planning, design and construction costs, is \$191,400. The current budget is \$67,500, which was approved in the Capital Improvement Program from the General Fund (101). The owner of the property on the northwest quadrant, Buzz Oates Enterprises II, has made a contribution of \$80,000 towards the project and those funds have been placed in the Capital Grants Fund (248). It is proposed that these funds be appropriated to the project and that should additional funds be needed for the project, the final budgetary recommendation be presented following receipt of bids.
