Re: Triple Stud for Holdown Post - Plan 4031: Parkside at Riverbend Subdivision
O'Connor Freeman Job Number: E000903

Mark:

Ken Wiseman contacted our office regarding concerns the Building Inspector had with the installation of a holdown in Plan 4031 in the Parkside at Riverbend subdivision. Specifically, the framers used (3) 2x6 studs in lieu of the 4x6 post for the holdown post as indicated on the plans. Ken wanted to know if the triple stud was an acceptable substitute for the 4x6 post. See the attached partial plan exhibit for reference and review.

The specification of the 4x6 holdown post was based upon our engineering judgment. It is our opinion that the installation of the STHD14 holdown onto multiply studs will be a problem. This is primarily due to the nails not being fully embedded into the wood members. If the nails for this holdown were driven into the gap between the studs, the capacity of the holdown would be greatly effected. Hence, it is our office policy to try to eliminate this problem by specifying a solid holdown post. *However, if the attachments of the nails for the STHD14 holdown were carefully driven into solid wood, the use of the (3) 2x6 studs would be acceptable.*

In addition, Ken informed our office that the shear wall sheathing was equally nailed into each of the multiply studs. However, the Building Inspector wanted to know how the nailing pattern for joining these multiple studs. After reviewing the tributary uplift loads for each of these studs, the framer needs to provide 16d sinkers at a six-inch spacing (16d @ 6" o/c).

If you should have any further questions or comments please do not hesitate to call.

Sincerely,

O'Connor Freeman & Associates, Inc.

An installation certificate is required to be posted at the building site prior to the issuance of the occupancy permit; this form may be used to meet these requirements. All appliance categories listed below are the actual equipment installed. Note that the efficiency and type of the appliance installed must be equivalent or better than the appliance specified on the certificate of compliance (Form CF-1R). This certificate (or its equivalent) shall be prepared and signed by the person(s) assuming overall responsibility for the appliance installation. Refer to the reverse side of this certificate for an explanation of information required.

I, the undersigned, verify that the equipment listed in the category above my signature is the actual equipment installed and that the equipment meets or exceeds the requirements of the Appliance Efficiency Standards. In addition, I have verified that the equipment is equivalent to or more efficient than the equipment specified on the Certificate of Compliance submitted to demonstrate compliance with the Energy Efficiency Standards for residential buildings.
