Description/Analysis

Issue: The City of Sacramento's Economic Development Department recommends approval of the attached resolution awarding 35.25 SRCSD sewer credits to the project known as 1600 H Street located in the downtown area (APN: 006-0063-001/ 006-0063-002)

Policy Considerations: The City of Sacramento views projects that promote urban infill development as an important cornerstone of the City's economic development. The City of Sacramento also supports such projects to make Sacramento the most Livable City in America. Approval of the subject recommendation serves to promote this City policy objective.

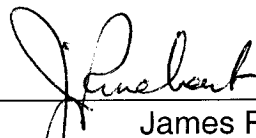

Environmental Considerations: This project is subject to the environmental review process as part of the approval of its development application

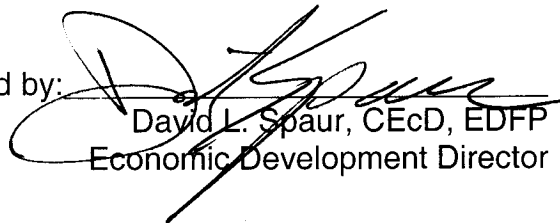

Rationale for Recommendation: This candidate for sewer credits meets Council-approved criteria for the granting of sewer credits because it is a high-density mixed-use urban infill project. To promote the goal of making Sacramento the most Livable City in America, it is recommended that Council grant the 35.25

the most Livable City in America, it is recommended that Council grant the 35.25 sewer connection fee credits to the 1600 H Street project. The project will bring over 42 residential units to the downtown area, which adds new permanent housing units to the Central City, and will serve as a catalyst for further high-density, mixed-use and urban infill projects near the project site with a proposed 5 retail condos for retail space.

Financial Considerations: Approval of the resolution imposes no additional expense upon the City beyond the minimal administrative costs associated with processing the approved credits.

Attachment 1**BACKGROUND:**

The Sacramento Regional County Sanitation District (SRCSD) established an Economic Development Treatment Capacity Bank (Bank) in June 2000 and the City of Sacramento received the June 2000 initial allocation of 7,971 Equivalent Single Family Dwellings (ESDs) Credits from the Bank. At the time, SRCSD limited local jurisdictions to using a maximum of 15 percent of its total allocation for residential purposes. The City of Sacramento subsequently received another allocation of 756 ESDs in March 2005, bringing the total ESDs to 8,727.

Following the allocation, the City requested greater latitude to use the Credits to assist in housing development. In response to the City's request, SRCSD reconvened the Stakeholders' Working Group to discuss the proposed additional flexibility for residential purposes, to recommend a methodology for allocation of additional excess capacity that the District has purchased, to recommend disbursement guidelines for the District's own allocation from the Bank, and to address other administrative actions.

Amendments in Resolution 2006-457 expanded the additional 15 percent annual allocation to also include infill and transit-oriented housing. This permitted each local jurisdiction to have more flexibility in using the Bank credits.

Resolution 2006-457 approved the amended Memorandum of Understanding (MOU) between the Sacramento Regional County Sanitation District (SRCSD) and the City and authorized the City Manager to execute the amended MOU. The Resolution also approved the Guidelines for the allocation and awarding of Treatment Capacity Bank Credits for commercial development, Downtown, low-income, and infill / transit-oriented development (TOD) projects.
