**OWNER-BUILDER DECLARATION:** I hereby affirm under penalty of perjury that I am exempt from the contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 8 of the Business and Professions Code) or that he or she is exempt herefrom and the basis for the alleged exemption: No violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.00).

I, as a owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code). The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his/her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he/she did not build or improve for the purpose of sale.

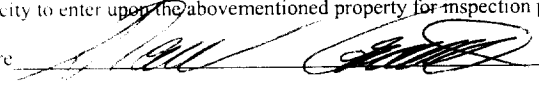

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code). The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.

I am exempt under Sec. \_\_\_\_\_ B & PC for this reason: \_\_\_\_\_

This set of plans and specifications must be kept on the job at all times and it is unlawful to make any changes or alterations from the same without written permission from the Building Inspection Division.  
The approval of this plan and specification SHALL NOT be held to permit or approve the violation of any City Ordinance or State Law.

**Disclaimer:**

*The sole purpose of this report is to visually inspect the general conditions of the construction of the existing roof and to determine it's structural adequacy for supporting the roof loads of the newly proposed roofing work.*

*The roofer will assume the responsibility to verify and repair any wood he witnesses during the course of his work showing any evidence of deterioration (dry rot, termite infestation). No testing and/or samples were taken during my inspection and thus no warranties or guarantees regarding the condition of the existing materials is expressed. The Engineer of Record of this report will not assume any liability associated with any claims related to damage resulting from deteriorated wood present in the existing house or damage related to the roofing work performed.*

I, Frank L. Gregorin, P.E., has visually inspected readily accessible areas of the roof structure of the residence located at 35 Stampede Court, Sacramento, California for Jose Aguirre, Owner of Aguirre Roofing, in compliance with Sacramento City Code, Section 9.03.146 (D) 3.

The structure is a single family one to two story house built in the late 1970's and it's roof structure is comprised of 1x skip sheathing over prefabricated gang nailed roof trusses at 24" o.c. with 2x4 chords and diagonals. The eaves do not exceed 3'-0". The existing timber that I visually inspected showed no visible signs of distress or deterioration and is deemed to be in sound condition.

From my experience this type prefabricated roof truss structure is typically designed for no less than a roof dead load of 10 psf top chord loading and a ceiling dead load of 10 psf bottom chord loading. It is my expert opinion that the existing roof truss structure can adequately support the existing material that is to remain and the new sheathing and "lightweight" tile (560#/square) to be added.

Roof Dead Load

(e) 2x4 top chord @ 24" o.c.	0.56 psf
(e) 1x6 skip sheathing	0.30 psf
(n) 1/2 CDX Plywood sheathing	1.50 psf
(n) roof paper	0.50 psf
(n) light-weight tile (580#/sq.)	5.80 psf
sum =	8.66 psf
	x 12.65/12 (4:12 slope adjustment)
	9.13 psf < 10 psf allowable, therefore O.K.

Check strength of overhang for maximum span of 3'-0" with 2x4 rafters at 24" o.c. maximum where may be occurring (assume DF No.2 minimum)

(e) 2x4 min. @ 24" o.c.	0.70 psf
(e) 2x decking or (n) plywd. o/ 1x shthg	4.50 psf
(n) light-weight 580# per square tile	5.80 psf
sum =	11.00psf
	x 12.65/12 (4:12 slope adjustment)
	11.60 psf , say 12 psf

Distributed Load = (12 psf DL + 16 psf LL) (2' spacing) = 56 plf

$V_{max} = (1.5) (56 \text{ plf}) (3') = 252 \#$   
 $f_v = (252 \#) / (5.25 \text{ sq. in.}) = 48 \text{ psi} < 118.75 \text{ psi} \Rightarrow F_v = 95 \times 1.25 \text{LDF}$

$M_{max} = (56 \text{ plf}) (3') (3'/2) = 252 \#$   
 $f_b = (252 \#) (12 \text{ in/ft}) / (3.0625 \text{ in}^3) = 988 \text{ psi} < 2562 \text{ psi} \Rightarrow F_b = 2050 \times 1.25 \text{LDF}$

Therefore strength of existing 2x4 min. eave rafters @ 24" o.c. max. w/ 3'-0" max. cantl. span  
therefore O.K.
