PLAN 4

Dolans Lumber

RE: Versa-Lam[®] Beam Design Values

This letter is in response to your question regarding the current design values of our 3 1/2" and wider Versa-Lam DF beams. Boise Cascade has been manufacturing these beams with an actual fiber stress bending value of 3080 lb/in² for the last several of years even though we have had a published design value of 2800 lb/in². We recently received an updated ICBO evaluation report for our Versa-Lam DF beam. In this report, a bending value of 3080 lb/in² is listed for the 3 1/2" and wider Versa-Lam beams.

Since Boise Cascade has been manufacturing beams at a higher bending value, Versa-Lam currently in the field with a 2800 stamp can be designed with the 3080 value. Therefore, all the design values of the 3 1/2", 5 1/4" and 7" wide Versa-Lam DF, except horizontal shear, will meet or exceed the design values published for the same size Parallam[®] beams. Horizontal shear stress for Versa-Lam will remain approximately 2% lower than Parallam. If you have any further questions regarding this matter, please feel free to contact me at 800.252.0788.

Sincerely,

Jeffrey K. Olson, P.E.
