Attention: Mr. Gary Larson

Reference: Our Field Evaluation of March 14, 1999

Subject: Modifications to Deadfront Switchboard No. 1 in
Electric Room 1 at 980 9th St., Sacramento, CA

Dear Mr. Larson:

We have completed our Field Evaluation of the subject modifications.

It was determined that these modifications complied with the applicable requirements and UL's Field Evaluated Product Marks were applied to the leftmost 400 A Feeder Section and the 4000 A Service Entrance Section to its right, where all modifications took place. Please note that the acceptability of the modifications is contingent upon the following:

- A. Appropriate Listed 400 A fuses are installed in the disconnect in the 400 A feeder section, and
- B. The 400 A feeder section is marked to indicate the maximum section rating is 400 A (rather than 800 A as originally indicated), as the new internal wiring is sized for 400 A.

The applied Field Evaluation Marks are considered void, unless/until the fuses and marking are added.

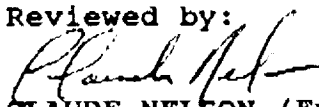

We are instructing our Accounting Department to close the above project and complete the final record of charges.

If we can be of further service, please contact us.
